

would simplify operator actions in the event of an accident and, therefore, would be a safety benefit.

The staff examined the licensee's rationale that supports the exemption request and concluded that the exemption requested for the recombiners and the post-accident containment vent system is justified as stated in the supporting safety evaluation. Additionally, elimination of the hydrogen recombiners and the post-accident containment vent system from the EOPs would be a simplification and a safety benefit. Consequently, pursuant to 10 CFR 50.12(a)(2)(ii), application of the regulation is not necessary to achieve the underlying purpose of the rule.

The safety evaluation may be examined, and/or copied for a fee at the NRC's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the ADAMS Public Library component on the NRC Web site, <http://www.nrc.gov> (the Public Reading Room).

#### 4.0 Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), the exemption pertaining to the recombiners and the post-accident containment vent system is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also, pursuant to 10 CFR 50.12(a)(2)(ii), special circumstances are present. Therefore, the Commission hereby grants Florida Power and Light Company an exemption from the requirements for the recombiners and the post-accident containment vent system as stated in 10 CFR 50.44 and 10 CFR part 50, Appendix A, General Design Criteria 41, 42 and 43 for the Turkey Point Plant, Units 3 and 4.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have a significant effect on the quality of the human environment (66 FR 59266).

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 12th day of December, 2001.
