

these points again here, but refer interested parties to that earlier discussion.

Conclusion

In accordance with 49 U.S.C. 31315 and 31136(e), the FMCSA extends the exemptions from the vision requirement in 49 CFR 391.41(b)(10) granted to Woodrow E. Bohley, Kenneth E. Bross, Charlie F. Cook, Russell W. Foster, Curtis N. Fulbright, Vincent I. Johnson, Richard L. Loeffelholz, Herman C. Mash, Frank T. Miller, Charles E. O'Dell, Martin Postma, Robert G. Rascicot, Jon H. Wurtele, and Walter M. Yohn, Jr., subject to the following conditions: (1) That each individual be physically examined every year (a) by an ophthalmologist or optometrist who attests that the vision in the better eye continues to meet the standard in 49 CFR 391.41(b)(10), and (b) by a medical examiner who attests that the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provide a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (3) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file and retain a copy of the certification on his/her person while driving for presentation to a duly authorized Federal, State, or local enforcement official. Each exemption will be valid for 2 years unless rescinded earlier by the FMCSA. The exemption will be rescinded if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31315 and 31136(e).

Request for Comments

The FMCSA has evaluated the qualifications and driving performance of the 14 applicants here and extends their exemptions based on the evidence introduced. The agency will review any comments received concerning a particular driver's safety record and determine if the continuation of the exemption is consistent with the requirements at 49 U.S.C. 31315 and 31136(e). While comments of this nature will be entertained at any time, the FMCSA requests that interested parties with information concerning the safety records of these drivers submit comments by January 28, 2002. All comments will be considered and will be available for examination in the

docket room at the above address. The FMCSA will also continue to file in the docket relevant information which becomes available. Interested persons should continue to examine the docket for new material.

Authority: 49 U.S.C. 322, 31136 and 31315; and 49 CFR 1.73.

Issued on: December 19, 2001.

Brian M. McLaughlin,

Associate Administrator, Policy and Program Development.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[DOT Docket No. FMCSA-99-5867]

Parts and Accessories Necessary for Safe Operation; Renewal of Fuel Tank Exemptions for Vehicles Manufactured by the Ford Motor Company

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Grant of applications for exemptions.

SUMMARY: The FMCSA is granting the application from the Ford Motor Company (Ford) for a renewal of exemptions for the vehicles specified at the end of this notice from certain fuel tank design and certification labeling requirements in the Federal Motor Carrier Safety Regulations (FMCSRs). The exemptions enable motor carriers to operate commercial motor vehicles (CMVs) manufactured by Ford, and equipped with fuel tanks that do not meet the FMCSA's requirements that fuel tanks be capable of receiving fuel at a rate of at least 20 gallons per minute, and be labeled or marked by the manufacturer to certify compliance with the design criteria. The FMCSA believes the terms and conditions of the exemptions have ensured a level of safety that is equivalent to the level of safety that would be achieved by complying with the regulations, and that renewing the exemptions would not adversely affect highway safety. The exemptions continue to preempt inconsistent State and local requirements applicable to interstate commerce.

DATES: The exemptions are effective on December 27, 2001. The exemptions expire on December 29, 2003.

FOR FURTHER INFORMATION CONTACT: Ms. Deborah M. Freund, Office of Bus and Truck Standards and Operations, (202) 366-4009, Federal Motor Carrier Safety

Administration, 400 Seventh Street, SW., Washington, DC 20590-0001. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Electronic Access

Internet users may access all comments that were submitted to this docket in response to the previous notice by using the universal resource locator (URL) <http://dms.dot.gov>, and by requesting the docket referenced at the beginning of this notice. You can examine and copy this document and all comments received at the U.S. Department of Transportation, Dockets Management Facility, Room PL-401, 400 Seventh Street, SW., Washington, DC 20590-0001 from 9 a.m. to 5 p.m. e.t., Monday through Friday, except Federal holidays.

Background

Ford's Applications for Exemptions

Ford applied for exemptions for the vehicles specified at the end of this notice from 49 CFR 393.67(c)(7)(ii), which requires that certain fuel tank systems on CMVs be designed to permit a fill rate of at least 20 gallons (75.7 liters) per minute, and 49 CFR 393.67(f)(2) and (f)(3), which require that liquid fuel tanks be marked with the manufacturer's name and a certification that the tank conforms to all applicable rules in § 393.67, respectively.

On August 10, 1999 (64 FR 43417), the FHWA published a notice of intent to grant Ford's applications. The FHWA requested public comment on Ford's applications and the agency's safety analysis, and presented other relevant information known to the agency. After considering all the comments received, the agency granted the exemptions on December 20, 1999 (64 FR 71184). In that notice (at 71185), the agency noted that the 20 gallon per minute rate referenced in the FMCSA's regulations, while appropriate for diesel fuel-powered vehicles, mandates that fill pipes on gasoline-powered vehicles be capable of receiving fuel at twice the maximum rate gasoline pumps are designed to dispense fuel. The vehicles in question are gasoline-fueled and are capable of receiving fuel at a rate of 17 gallons per minute.

The exemptions covered § 393.67(c)(7)(ii), Construction of liquid fuel tanks; fill pipe, and §§ 393.67(f)(2) and (f)(3)(ii) which require that liquid fuel tanks be marked with the manufacturer's name, and a certification

that the tank conforms to all applicable rules in § 393.67, respectively.

On November 2, 2001 (66 FR 55727), the FMCSA published a notice of intent to renew this exemption for the specified vehicles. The FMCSA requested public comment on Ford's applications and the agency's safety analysis.

Discussion of Comments to the Notice of Intent to Renew the Exemptions

The FMCSA received one comment, from Ford. Ford requested that the FMCSA renew its exemption for the fuel tanks covered in the November 2, 2001 notice. Ford also requested extension of exemptions to cover the fuel tanks of additional models of E-series vehicles that were not in production at the time of the original 1999 petition, and for certain F-series vehicles.

FMCSA Decision

The FMCSA considered the comments received in response to the November 2 notice and has decided to renew the exemptions for the vehicles specified in that notice. The commercial motor vehicles covered by the exemptions are still in operation, and the agency is not aware of any information, anecdotal or otherwise, that would suggest that the level of safety for the exempted vehicles is not equivalent to the level of safety that would have been achieved if the vehicles complied with §§ 393.67(c)(7)(ii), 393.67(f)(2), and 393.67(f)(3)(ii). No interested parties have contacted the FMCSA or submitted comments to the docket since the December 20, 1999, the date the exemption was granted, indicating that any aspects of the exemptions have had an adverse effect on highway safety. Accordingly, the agency is proposing to renew the exemptions that were the subject of the November 2 notice for another two-year period.

In a separate notice in today's **Federal Register**, the FMCSA announces its preliminary determination of intent to grant Ford's application for an exemption to the additional E-class and F-class vehicles.

Terms and Conditions for the Exemption

The FMCSA is continuing to provide exemptions to §§ 393.67(c)(7)(ii), 393.67(f)(2), and 393.67(f)(3)(ii) for motor carriers operating the vehicles of Ford Econoline-based vehicles specified in the next paragraph. The exemptions are effective upon publication in the **Federal Register** pursuant to 5 U.S.C. 553(d)(1) and are valid until December 29, 2003, unless revoked earlier by the

FMCSA. Ford, or any of the affected motor carriers, may apply to the FMCSA for another renewal of the exemption. The exemption continues to preempt inconsistent State or local requirements applicable to interstate commerce.

As with the original exemption, the motor carriers operating these specified vehicles are not required to maintain documentation concerning the exemption because the vehicles and fuel tanks have markings that would enable enforcement officials to identify them. The vehicles covered by the exemptions can be identified by their vehicle identification numbers (VINs). The VINs contain E30, E37, E39, E40, or E47 codes in the fifth, sixth, and seventh positions. The fuel tanks are marked with Ford part numbers F3UA-9002-G*, F3UA-9002-H*, F4UA-9002-V*, F4UA-9002-X*, F5UA-9002-V*, F5UA-9002-X*, F6UA-9002-Y*, F6UA-9002-Z*, F7UA-9002-C*, and F7UA-9002D* where the asterisk (*) represents a "wild card" character (any character of the alphabet).

Issued on: December 20, 2001.

Joseph M. Clapp,
Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[DOT Docket No. FMCSA-99-5867]

Parts and Accessories Necessary for Safe Operation; Fuel Tank Exemptions for Vehicles Manufactured by the Ford Motor Company

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of applications for exemptions and intent to grant exemptions; request for comments.

SUMMARY: The FMCSA is announcing its intent to grant exemptions for additional vehicles specified at the end of this notice, in response to an application from the Ford Motor Company (Ford), from certain fuel tank design and certification labeling requirements in the Federal Motor Carrier Safety Regulations (FMCSRs). This exemption would enable motor carriers to continue operating commercial motor vehicles (CMVs) manufactured by Ford, and equipped with fuel tanks that do not meet the FMCSA's requirements that fuel tanks be capable of receiving fuel at a rate of at least 20 gallons per minute, and be labeled or marked by the

manufacturer to certify compliance with the design criteria. The FMCSA believes the terms and conditions of the current exemptions have ensured a level of safety that is equivalent to the level of safety that would be achieved by complying with the regulations, and that granting the additional exemptions would not adversely affect highway safety. The additional exemptions, if granted, would continue to preempt inconsistent State and local requirements applicable to interstate commerce.

DATES: Comments must be received on or before January 28, 2002.
