Service Rules for the 746–764 and 776–794 MHz Bands; Revisions to Part 27 of the Commission's Rules

AGENCY: Federal Communications Commission.

ACTION: Final rule; petition for reconsideration.

SUMMARY: This proceeding considers service rules for the 747–762 and 777–792 MHz bands (the lower and upper 700 MHz commercial bands). The Commission, in this document, affirms an earlier decision that base station transmitters should be permitted to operate in the upper 700 MHz commercial band and denies a petition for reconsideration of this issue. This action also responds to the petitioner's request for clarification as to the appropriate out-of-band emission standard for control stations operating in the 700 MHz commercial bands.

DATES: Effective February 6, 2001.

FOR FURTHER INFORMATION CONTACT: Legal Information: Stan Wiggins, 202–418–1310; Technical Information: Marty Liebman, 202–418–1310.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Second Memorandum Opinion and Order* (Second MO&O) in WT Docket No. 99–168; CS Docket No. 98–120, and MM Docket No. 00–39, FCC 01–02, adopted January 2, 2001, and released January 12, 2001. The complete text of this Second MO&O is available for inspection and copying during normal business hours in the FCC Reference Information Center, Courtyard Level, 445 12th Street, SW., Washington, DC and also may be purchased from the Commission's copy contractor, International Transcription Services (ITS, Inc.), CY–B400, 445 12th Street, SW., Washington, DC.

Synopsis of the Second Memorandum Opinion and Order

1. The Commission adopts a Second Memorandum Opinion and Order (Second MO&O) in the above-cited proceeding, with regard to service rules for the 747–762 and 777–792 MHz bands. The Second MO&O responds to a petition for reconsideration of the decision in the Memorandum Opinion and Order in this docket (65 FR 42879, July 12, 2000) to permit base station transmitters to operate in both the lower

and upper 700 MHz commercial bands. Motorola, Inc. (Motorola) asked that the Commission reconsider this decision. As detailed in paragraphs 1 through 13 of the full text of the Second MO&O, the Commission finds that allowing such transmissions should not cause additional interference for public safety operations, will allow for the broadest possible use of this spectrum, consistent with sound spectrum management, and will expand participation in the auction and increase the potential for new technologies and new services.

2. The Commission concludes that, while interference is highly unlikely to occur as a result of this decision, where instances of interference actually occur they can be readily addressed on a case-by-case basis, and that historically-followed coordination procedures, requiring cooperation and accommodation by both commercial and public safety entities, will generally be able to resolve such interference. The Commission indicates that should routine coordination procedures fail to resolve the interference, it will consider other appropriate mitigation measures.

3. Motorola also sought clarification as to the appropriate out-of-band emission standard for control stations operating in the 700 MHz commercial bands. The Commission, in the Second MO&O, clarifies that control stations, which are fixed stations, must comply with the same $76 + 10 \log P$ emission standard that applies to all base and fixed stations.

Deployment of Wireline Services Offering Advanced Telecommunications Capability and Implementation of the Local Competition Provisions of the Telecommunications Act of 1996

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document addresses five petitions for reconsideration and/or clarification of the Commission's Line Sharing Order, in which the Commission required incumbent local exchange carriers (LECs) to make a portion of their voice customer's local loop available to competitive providers of advanced services. The Commission denies two of these petitions, and grants three of them.

DATES: Effective February 6, 2001.

Synopsis of Reconsideration Order

1. The Commission takes several actions in this Reconsideration Order with respect to line sharing. Specifically, it clarifies that the requirement for an incumbent LEC to provide line sharing applies to the entire loop, even where the incumbent LEC has deployed fiber in the loop. With regard to line splitting, it grants AT&T and WorldCom's request for clarification that the incumbent LECs must permit competing carriers

providing voice service using the unbundled-network-element (UNE) platform to self-provision or partner with a data carrier in order to provide voice and data service on the same line. The Commission denies Bell Atlantic's request for clarification that data carriers participating in line sharing arrangements are not required to have access to the loop's entire frequency range for testing purposes. It also denies Bell Atlantic's request that the Commission reconsider the requirement that incumbent LECs refusing to condition a loop demonstrate to the relevant state commission that conditioning the specific loop in question will significantly degrade voiceband services. Also, the Commission grants the joint petition of the National Telephone Cooperative Association and the National Rural Telephone Association for clarification regarding the line sharing obligations of rural incumbent LECs. The Commission rejects Bell Atlantic's contention that the industry is permitted to adopt a line sharing deployment schedule other than the one developed in the Line Sharing Order.

2. The Commission also takes several actions concerning spectrum management. First, it denies BellSouth's request that the Commission reconsider its finding that new technologies are presumed deployable anywhere when successfully deployed in one state without significantly degrading the performance of other services. Second, it denies Bell Atlantic's request for the Commission to reconsider its conclusion that state commissions are in the best position to determine the disposition of known disturbers in the network.
