

14. National Archives and Records Administration, Agency-wide (N1-64-02-8, 1 item, 1 temporary item). Routine requests for information, forms, and publications for which no research is required for reply.

15. National Credit Union Administration, Office of Strategic Planning (N1-413-02-3, 4 items, 3 temporary items). Files relating to the Government Performance and Results Act, including such records as correspondence, plans, distribution lists, planning schedules, semi-annual performance plans, audits/reviews, background papers, and other administrative records. Also included are electronic copies of documents created using electronic mail and word processing. Proposed for permanent retention are recordkeeping copies of strategic plans, annual performance plans, annual operating plans, and annual performance reports.

16. National Credit Union Administration, Office of General Counsel (N1-413-02-4, 10 items, 6 temporary items). Records relating to litigation and administrative hearings. Also included are electronic copies of documents accumulated by the Office of General Counsel created using electronic mail and word processing. Records proposed for permanent retention include recordkeeping copies of legal opinions, Freedom of Information Act reports, and rulemaking files.

17. National Credit Union Administration, Office of Corporate Credit Unions (N1-413-02-5, 5 items, 3 temporary items). Inputs and outputs for an electronic system relating to credit union supervision, examination, and insurance activities. The electronic data is proposed for permanent retention along with the related system documentation.

Dated: March 29, 2002.

BILLING CODE 7515-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-3392, License No. SUB-526,
EA 02-025]

Honeywell International, Inc., Metropolis Works Facility, Metropolis, Illinois; Order Modifying License; (Effective Immediately)

I

Honeywell International, Inc. ("Honeywell" or the "licensee") holds Materials License No. SUB-526, issued by the U.S. Nuclear Regulatory Commission (NRC or Commission) authorizing the licensee to receive, acquire, possess and transfer byproduct and source material in accordance with the Atomic Energy Act of 1954 and 10 CFR parts 30 and 40. Commission regulations at 10 CFR 20.1801, require the licensee to secure licensed material from unauthorized removal or access from controlled or unrestricted areas. Further, License Condition 10 of Materials License No. SUB-526, as amended, requires that the licensee implement and maintain specific measures to control public and private access to the facility as described in the October 1, 1998 enclosure to its application dated September 23, 1998.

II

On September 11, 2001, terrorists simultaneously attacked targets in New York, NY, and Washington, DC, utilizing large commercial aircraft as weapons. In response to the attacks and intelligence information subsequently obtained, the Commission issued a number of Safeguards and Threat Advisories to its licensees in order to strengthen licensees' capabilities and readiness to respond to a potential attack on a nuclear facility. The Commission has also communicated with other Federal, State and local government agencies and industry representatives to discuss and evaluate the current threat environment in order to assess the adequacy of security measures at licensed facilities. In addition, the Commission has commenced a comprehensive review of its safeguards and security programs and requirements.

As a result of its initial consideration of current safeguards and security plan requirements, as well as a review of information provided by the intelligence community, the Commission issued a Confirmatory Action Letter, No. RIII-01-005, dated December 21, 2001, to Honeywell, confirming the Licensee's agreement to immediately implement enhanced security measures and review

longer term security enhancements to the site. The Commission has now determined that certain compensatory measures should be required to be implemented by the licensee as prudent, interim measures to address the current threat. Therefore, the Commission is imposing interim requirements, set forth in Attachment 1¹ of this Order, which supplement existing regulatory requirements, to provide the Commission with reasonable assurance that the public health and safety and common defense and security continue to be adequately protected in the current threat environment. This order supercedes the Confirmatory Action Letter of December 21, 2001. These requirements will remain in effect pending notification from the Commission that a significant change in the threat environment occurs, or until the Commission determines that other changes are needed following a comprehensive re-evaluation of current safeguards and security programs.

The Commission recognizes that some of the requirements set forth in Attachment 1² to this Order may already have been initiated by Honeywell in response to previously issued advisories, Confirmatory Action Letter No. RIII-01-005, or on its own. It is also recognized that some measures may need to be tailored to specifically accommodate the specific circumstances and characteristics existing at the licensee's facility to achieve the intended objectives and avoid any unforeseen effect on safe operation. And, although the licensee's response to the Safeguards and Threat Advisories and the December 21, 2001 Confirmatory Action Letter has been adequate to provide reasonable assurance of adequate protection of public health and safety, the Commission believes that the response must be supplemented because the current threat environment has persisted longer than expected and as a result, it is appropriate to require certain security measures so that they are maintained within the established regulatory framework. Thus, in order to provide assurance that the licensee is implementing prudent measures to achieve a consistent level of protection to address the current threat environment, Materials License No.

¹ Attachment 1 contains SAFEGUARDS information and will not be released to the public.

² To the extent that specific measures identified in Attachment 1 to this Order require actions pertaining to the Licensee's possession and use of chemicals, such actions are being directed on the basis of the potential impact of such chemicals on radioactive materials and activities subject to NRC regulation.

SUB-526 is modified to include the requirements identified in Attachment 1 to this Order. In addition, pursuant to 10 CFR 2.202, I find that, in the circumstances described above, the public health, safety and interest require that this Order be immediately effective.

III

Accordingly, pursuant to Sections 63, 81, 161b, 161i, 161o, 182 and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR parts 30 and 40, *It is hereby ordered, effective immediately, that Materials License No. SUB-526 is modified as follows:*

A. The Licensee shall, notwithstanding the provisions of any Commission regulation or license to the contrary, comply with the requirements described in Attachment 1 to this Order. The Licensee shall immediately start implementation of the requirements in Attachment 1 to the Order and shall complete implementation no later than July 1, 2002.

B. 1. The Licensee shall, within twenty (20) days of the date of this Order, notify the Commission, (1) if it is unable to comply with any of the requirements described in Attachment 1, (2) if compliance with any of the requirements is unnecessary in its specific circumstances, or (3) if implementation of any of the requirements would cause the Licensee to be in violation of the provisions of any Commission regulation or the facility license. The notification shall provide the Licensee's justification for seeking relief from or variation of any specific requirement.

2. If the Licensee considers that implementation of any of the requirements described in Attachment 1 to this Order would adversely impact safe operation of the facility, the Licensee must notify the Commission, within twenty (20) days of this Order, of the adverse safety impact, the basis for its determination that the requirement has an adverse safety impact, and either a proposal for achieving the same objectives specified in the Attachment 1 requirement in question, or a schedule for modifying the facility to address the adverse safety condition. If neither approach is appropriate, the Licensee must supplement its response to Condition B1 of this Order to identify the condition as a requirement with which it cannot comply, with attendant justifications as required in Condition B1.

C. 1. The Licensee shall, within twenty (20) days of the date of this Order, submit to the Commission, a schedule for achieving compliance with

each requirement described in Attachment 1.

2. The Licensee shall report to the Commission, when it has achieved full compliance with the requirements described in Attachment 1.

D. Notwithstanding any provision of the Commission's regulations to the contrary, all measures implemented or actions taken in response to this Order shall be maintained pending notification from the Commission that a significant change in the threat environment occurs, or until the Commission determines that other changes are needed following a comprehensive re-evaluation of current safeguards and security programs.

Licensee responses to Conditions B.1, B.2, C.1, and C.2, above shall be submitted in accordance with 10 CFR 30.6 and 40.5. In addition, Licensee submittals that contain Safeguards Information shall be properly marked and handled in accordance with 10 CFR 73.21.

The Director, Office of Nuclear Material Safety and Safeguards, may, in writing, modify, relax or rescind any of the above conditions upon demonstration by the Licensee of good cause.

IV

In accordance with 10 CFR 2.202, the Licensee must, and any other person adversely affected by this Order may, submit an answer to this Order, and may request a hearing on this Order, within 20 days of the date of this Order. Where good cause is shown, consideration will be given to extending the time to request a hearing. A request for extension of time in which to submit an answer or request a hearing must be made in writing to the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and include a statement of good cause for the extension. The answer may consent to this Order. Unless the answer consents to this Order, the answer shall, in writing and under oath or affirmation, specifically set forth the matters of fact and law on which the Licensee or other person adversely affected relies and the reasons as to why the Order should not have been issued. Any answer or request for a hearing shall be submitted to the Secretary, U.S. Nuclear Regulatory Commission, Attn: Rulemakings and Adjudications Staff, Washington, DC 20555. Copies also shall be sent to the Director, Office of Nuclear Material Safety and Safeguards, and the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555, to the Assistant

General Counsel for Materials Litigation and Enforcement, at the same address, to the Regional Administrator, NRC Region III, 801 Warrenville Road, Lisle, Illinois 60532, and to the Licensee if the answer or hearing request is by a person other than the Licensee. If a person other than the Licensee requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d).

If a hearing is requested by the Licensee or a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained.

Pursuant to 10 CFR 2.202(c)(2)(i), the Licensee, may, in addition to demanding a hearing, at the time the answer is filed or sooner, move the presiding officer to set aside the immediate effectiveness of the Order on the ground that the Order, including the need for immediate effectiveness, is not based on adequate evidence but on mere suspicion, unfounded allegations, or error.

In the absence of any request for hearing, or written approval of an extension of time in which to request a hearing, the provisions specified in Section III above shall be final 20 days from the date of this Order without further order or proceedings. If an extension of time for requesting a hearing has been approved, the provisions specified in Section III shall be final when the extension expires if a hearing request has not been received. An answer or a request for hearing shall not stay the immediate effectiveness of this order.

Dated this 29th day of March, 2002.

For the Nuclear Regulatory Commission.

Martin J. Virgilio,

Director, Office of Nuclear Material Safety and Safeguards.
