### Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 498–1210.

*Comments are invited on:* (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS–D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

*Proposed Project:* National Surveillance of Dialysis-Associated Diseases (0920-0033)—Extension—National Center for Infectious Diseases (NCID), Centers for Disease Control and Prevention (CDC). The Division of Healthcare Quality Promotion (DHQP; formerly Hospital Infections Program), is proposing an extension of a yearly survey of dialysis practices and dialysis-associated diseases at U.S. outpatient hemodialysis centers. The rehabilitation of individuals in the United States who suffer from chronic renal failure has been identified as an important national priority; since 1973, chronic hemodialysis patients have been provided financial support by the

Federal Government. DHQP and the Division of Viral Hepatitis have responsibility for formulating strategies for the control of hepatitis, bacteremia, and other hemodialysis-associated diseases.

In order to devise such control measures, it is necessary to determine the extent to which the incidence of these dialysis-associated diseases changes over time. This request is to continue surveillance activities among chronic hemodialysis centers nationwide. In addition, once control measures are recommended it is essential that such measures be monitored to determine their effectiveness. The survey is conducted

once a year by a mailing to all chronic hemodialysis centers licensed by the Health Care Financing Administration. The types of dialysis practices surveyed include the use of hepatitis B vaccine in patients and staff members, the types of vascular access and dialyzers used, whether certain dialysis items are disinfected for reuse, and whether the dialysis center has any policy for insuring judicious use of antimicrobial agents. Among dialysis-associated diseases, the survey includes hepatitis B virus infection, antibody to hepatitis C virus, antibody to human immunodeficiency virus, and vancomycin-resistant enterococci. There are no costs to respondents.

Respondents	Number of respondents	Number of responses/respondent	Avg. burden/response (in hours)	Total burden (in hours)
Chronic Hemodialysis Centers .....	3,800	1	1	3,800
Total .....	.....	.....	.....	3,800

*Proposed Project:* Report of Verified Case of Tuberculosis (RVCT) (CDC 72.9A, 72.9B, 72.9C) OMB No. 0920-0026—Extension—National Center for HIV, STD, and TB Prevention (NCHSTP), Centers for Disease Control and Prevention (CDC).

The Centers for Disease Control and Prevention (CDC), National Center for HIV, STD, and TB Prevention (NCHSTP), Division of Tuberculosis Elimination (DTBE), proposes to continue data collection for the Report of Verified Case of Tuberculosis (RVCT) (CDC 72.9A, 72.9B, 72.9C), previously approved under OMB No. 0920-0026 in 1992, 1995, 1998, and 2001. This request is for a 3-year revision of OMB clearance approval beginning January 1, 2003 (current OMB No. 0920-0026 expiration date is December 31, 2002). CDC is requesting OMB clearance for revision of the RVCT which will change the race and ethnicity variables on the RVCT form to comply with the OMB "Standards for Maintaining, Collecting, and Processing Federal Data on Race and Ethnicity".

To accomplish the CDC goal of eliminating tuberculosis (TB) in the United States, CDC maintains the national TB surveillance system. The system, initiated in 1953, has been modified several times to better monitor and respond to changes in TB morbidity. The most recent modification was implemented in 1993 when the RVCT was expanded in response to the TB epidemic of the late 1980s and early 1990s and incorporated into a CDC software for electronic reporting of TB case reports to CDC. The expanded system improved the ability of CDC to monitor important aspects of TB epidemiology in the United States, including drug resistance, TB risk factors, including HIV coinfection, and treatment. The timely system also enabled CDC to monitor the recovery of the nation from the resurgence and identify that current TB epidemiology supports the renewed national goal of elimination. To measure progress in achieving this goal, as well as continue to monitor TB trends and potential TB outbreaks, identify high risk populations for TB, and gauge program performance, CDC proposes to extend use of the RVCT.

Data are collected by 60 Reporting Areas (the 50 states, the District of Columbia, New York City, Puerto Rico, and 7 jurisdictions in the Pacific and Caribbean) using the RVCT. An RVCT is completed for each reported TB case and contains demographic, clinical, and laboratory information. A comprehensive software package, the Tuberculosis Information Management
