(a/k/a Superior Solvents & Chemicals); Texaco Group, Inc.; Transchemical, Inc.; and U.S. Polymers, Inc. In January 2002, Region VII entered into a *de minimis* administrative settlement pursuant to section 122(g) of CERCLA, 42 U.S.C. 9622(g) with 78 *de minimis* parties previously listed for the Great Lakes Container Corporation Superfund Site.

Great Lakes Container Corporation is a former drum reclamation company who operated at the Site from 1976 to 1985. The same business was operated as Northwestern Cooperage Company from the 1950's to 1976 and then operated as Great Lakes Container Corporation. EPA conducted time-critical removals completed in 1998 that consisted primarily of soil and drum removals. The EPA incurred costs of approximately \$9,127,244.30. The hazardous substances at this Site consisted primarily of lead and polychlorinated biphenyls. Liability is based on the theory that the *de minimis* parties arranged for disposal of hazardous substances at the Site by shipping drums for reclamation coated with paint containing lead. The *de minimis* parties either admitted that they sent drums for reclamation to the Site or EPA had separate evidence to prove that *de minimis* parties sent drums for reclamation to the Site.

The settlements have been approved by the U.S. Department of Justice because the response costs in this matter exceed \$500,000.00. Total past costs are \$8,733,482.70 and future costs will include costs of litigation for recovering costs against remaining parties. This settlement is being offered to those parties who are liable for no more than one-quarter a percent (.25%) of EPA's past costs at the Site. The majority of *de minimis* parties are each required to pay \$4,839.44 or \$5,133.72 depending on whether the party was required to pay prejudgment interest. Other settlements made for six parties *de minimis* varied from \$3,794.19 to \$22,856.56 because more volume-specific information was available for them allowing EPA to refine the calculation. The amount and toxicity of hazardous substances contributed by these parties were minimal as compared to other parties' shares of hazardous substances. The EPA determined these amounts to be the *de minimis* parties' fair share of liability based on the amount of hazardous substances generated and disposed of at the Site and the volume of waste contributed by each of the parties. These settlements include contribution protection from lawsuits by other potentially responsible parties as provided for under Section 122(g)(5) of CERCLA, 42 U.S.C. 9622(g)(5).

The *de minimis* settlement provides that EPA covenants not to sue the *de minimis* parties for response costs at the Site or for injunctive relief pursuant to Sections 106 and 107 of CERCLA and section 7003 of the Resource Conservation and Recovery Act of 1976, as amended (RCRA), 42 U.S.C. 6973. The settlement contains a reopener

clause which nullifies the covenant not to sue if any information becomes known to EPA that indicates that the parties no longer meet the criteria for a *de minimis* settlement set forth in Section 122(g)(1)(A) of CERCLA, 42 U.S.C. 9622(g)(1)(A). The covenant not to sue does not apply to the following matters:

(a) Claims based on a failure to make the required payment;

(b) Claims based on the future arrangement for disposal or treatment of any hazardous substance, pollutant, or contaminant at the Site after the effective date of the *de minimis* settlement;

(c) Criminal liability; or

(d) Liability for damages or injury to, destruction of, or loss of the natural resources and for the costs of any natural resource damage assessments.

The *de minimis* settlements will become effective upon the date which the EPA issues a written notice to the parties that the statutory public comment period has closed and that comments received, if any, do not require modification, of or EPA withdrawal from the settlement.

Dated: April 24, 2002.

William Rice,

Acting Regional Administrator, U.S. Environmental Protection Agency, Region VII.
