Fisheries of the Northeastern United States; Atlantic Herring Fishery; 2002 Specifications

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final 2002 specifications for the Atlantic herring fishery.

SUMMARY: NMFS issues final specifications for the 2002 Atlantic herring fishery. The intent of the specifications is to conserve and manage the herring resource and provide for sustainable fisheries, and to comply with the provisions in the Fishery Management Plan for Atlantic Herring (FMP), which require annual specifications for the fishery. This rule

also corrects and clarifies the final rule implementing the FMP by clarifying the vessel owners' or operators' reporting requirements.

DATES: The amendment to § 648.7 is effective January 24, 2002; the specifications are effective January 24, 2002, through December 31, 2002.

ADDRESSES: Copies of supporting documents, including the Environmental Assessment, Regulatory Impact Review, Initial Regulatory Flexibility Analysis (EA/RIR/IRFA), Essential Fish Habitat Assessment, Final Regulatory Flexibility Analysis, and the Stock Assessment and Fishery Evaluation (SAFE) Report for the 2000 Atlantic Herring Fishing Year are available from Paul J. Howard, Executive Director, New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950. The EA/RIR/IRFA is accessible via the Internet at <http://www.nefmc.org>.

FOR FURTHER INFORMATION CONTACT:

Myles Raizin, Fishery Policy Analyst, (978) 281–9104, e-mail at Myles.A.Raizin@noaa.gov, fax at (978) 281–9135.

SUPPLEMENTARY INFORMATION:

Regulations implementing the FMP appear at 50 CFR part 648, subpart K. The FMP requires the New England Fishery Management Council (Council), with the Atlantic States Marine Fisheries Commission (Commission), to develop and recommend the following specifications annually: Allowable biological catch (ABC), optimum yield (OY), domestic annual harvest (DAH), domestic annual processing (DAP), total foreign processing (JVPT), joint venture processing (JVP), internal waters processing (IWP), U.S. at-sea processing (USAP), border transfer (BT), total allowable level of foreign fishing (TALFF), and reserve (if any). The Council and Commission also recommend the total allowable catch (TAC) for each management area and sub-area identified in the FMP. A proposed rule to implement the 2002 Atlantic herring specifications was published in the Federal Register on October 29, 2001 (66 FR 54498), with a comment period ending November 28, 2001. The process used to develop the specifications was thoroughly described in the preamble to the proposed rule and is not repeated here.

Final 2002 Specifications

Specifications for the 2002 fisheries are provided below. The only changes from the 2001 specifications are an increase in estimated DAH/DAP by 5,000 mt and a resulting decrease in TALFF to zero. The impacts of this

change are discussed in the proposed rule and the EA/RIR for the 2002 herring specifications.

TABLE. SPECIFICATIONS AND AREA TACS FOR THE 2002 ATLANTIC HERRING FISHERY

Specification	Proposed Allocation (mt)
ABC	300,000

This rule also implements a change to § 648.7(b)(1)(iii)(B) and adds § 648.7(b)(1)(iii)(C) to clarify the Council's intent concerning the reporting requirements for owners or operators of vessels who have been issued Atlantic herring permits but who are not required to have a Vessel Monitoring System (VMS) unit on board the vessel. This rule clarifies that only owners or operators of vessels that catch 2,000 lb (907.2 kg) or more of Atlantic herring on any one trip in a week must submit an Atlantic herring catch report via the Interactive Voice Response (IVR) reporting system by Tuesday of the following week. Even if the herring has not yet been landed, the operator must estimate the amount of herring on board the vessel and report that amount via the IVR system. As currently written, the regulations imply that this provision applies at all times to any owner or operator of a vessel issued a Federal permit for Atlantic herring who is not required to have a VMS unit on board the vessel. In addition, this rule clarifies that owners or operators of vessels that catch 2,000 lb (907.2 kg) or more of Atlantic herring, some or all of which is caught in or from the EEZ, on any trip in a week, must submit an Atlantic herring catch report via the IVR system for that week. As currently written, the regulations require that the reporting provision also applies at all times to vessels catching herring in or from the EEZ. A review of the FMP and background material germane to the issue shows that this clarifying change is consistent with Council intent.
