SUPPLEMENTARY INFORMATION:

Title: Nonconformance Penalties for Heavy-Duty Engines and Heavy-Duty Vehicles, Including Light-Duty Trucks; Reporting And Recordkeeping Requirements; OMB Control No. 2060-0132; EPA ICR No. 1285.05, expired 5/31/1997, reinstatement. This is a request for reinstatement with change of a previously approved collection for which approval has expired.

Abstract: Section 206(g) of the Act as amended in 1990 contains the nonconformance penalty (NCP) provisions. It requires tests of production engines and vehicles to determine the extent of their nonconformity. Nonconformance penalties allow a manufacturer to introduce into commerce heavy-duty engines or vehicles including light-duty trucks, which fail to conform with certain emission standards upon payment of a monetary penalty. A

manufacturer that elects to pay a nonconformance penalty must perform a Production Compliance Audit (PCA). The collection activities of the nonconformance penalty program include periodic reports and other information (including the results of emission testing conducted during the PCA) which the manufacturer will create and submit to the Certification and Compliance Division (CCD), Office of Transportation and Air Quality (OTAQ), Office of Air and Radiation (OAR). CCD will use this information to ensure that manufacturers are complying with the regulations and that appropriate nonconformance penalties are being paid. Responses to this collection are voluntary based on the fact that participation in the nonconformance penalty program is an option that is available to manufacturers. Once a manufacturer opts to participate, specific regulatory requirements must be fulfilled in order to obtain a benefit under the NCP. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The Federal Register document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 01/29/02 (67 FR 4252); no comments were received.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 23 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: On-Highway engine and vehicle manufacturers.

Estimated Number of Respondents: 2.
Frequency of Response: 52.
