Department of the Army; Corps of Engineers

Intent To Prepare an Environmental Impact Statement for the Arkansas River Navigation Study, Phase II, AR and OK

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA), the U.S. Army Corps of Engineers (USACE), Little Rock District will prepare an Environmental Impact Statement (EIS) for the Arkansas River Navigation Study, Phase II.

The purpose of the EIS will be to present alternatives and assess the impacts associated with the deepening of several portions of the McClellan-Kerr Arkansas River Navigation System (McKARNS) channel, so that portions of or the entire system would have a navigable depth up to 12 feet, instead of the existing 9-foot deep channel. Under direction of the U.S. Congress, the USACE is conducting this study. The study area includes the Arkansas River Basin in Arkansas and Oklahoma. Deepening the navigation channel would allow the hauling of heavier loads on barges that use the system. Proposed improvements resulting from the study could impact (positively or negatively) agriculture, hydropower, recreation, flood control, and fish and wildlife along the McKARNS.

The EIS will evaluate potential impacts (positive and negative) to the natural, physical, and human
