

NUCLEAR REGULATORY COMMISSION**[Docket Nos. 50-335 AND 50-389]****Florida Power and Light Company, et al.; Notice of Withdrawal of Application for Amendment to Facility Operating License**

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Florida Power and Light Company, et al. (the licensee) to withdraw its October 18, 2001, application for proposed amendment to Facility Operating License Nos. DPR-67 and NPF-16 for the St. Lucie Plant, Unit Nos. 1 and 2, respectively, located in St. Lucie County, Florida.

The proposed amendment would have revised the Technical Specifications regarding Engineered Safety Feature Actuation System instrumentation to limit the period of time that inoperable recirculation actuation signal, containment spray actuation signal, and auxiliary feedwater actuation signal input channels could be in the bypassed and/or tripped condition.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on November 28, 2001 (66 FR 59507). However, by letter dated June 6, 2002, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated October 18, 2001, and the licensee's letter dated June 6, 2002, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams/html>. NUCLEAR REGULATORY COMMISSION**Yucca Mountain Review Plan, NUREG-1804, Revision 2, Draft Report for Comment**

AGENCY: Nuclear Regulatory Commission.

ACTION: Extension of comment period.

SUMMARY: On March 29, 2002 (67 FR 15257), and April 5, 2002 (67 FR 16490), the U.S. Nuclear Regulatory Commission (NRC) published for a 90-day public comment period the "Yucca Mountain Review Plan, NUREG-1804, Revision 2, Draft Report for Comment." The public comment period was to have expired on June 27, 2002. The NRC conducted public meetings on the draft review plan on May 21-23, 2002. During these meetings, NRC received a request to extend the comment period by an additional 90 days and conduct additional public meetings on the draft review plan. The requester cited not having received the document in a timely manner as the reason for the extension request. The draft review plan provides guidance to the NRC staff for evaluating a potential license application for a geologic repository.

After careful consideration of the request, NRC has decided to extend the public comment period for an additional 45 days. The extended comment period will now expire on August 12, 2002. The NRC believes that it has provided ample opportunity for interested individuals to comment on the draft review plan and thus does not intend to conduct additional public meetings at this time.

DATES: The public comment period has been extended and now expires on August 12, 2002. Comments received after this date will be considered, if it is practical to do so, but the Commission is able to assure consideration only for comments received on or before this date.

ADDRESSES: Submit written comments to: Michael T. Lesar, Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Mail Stop T-6D59, Washington, DC 20555-0001. Deliver
