Proposed Project

Survey of Awareness, Knowledge, and Use of the National Report on Human Exposure to Environmental Chemicals by Health Care Providers, Public Health Professionals, Policy Makers, and Environmental Scientists—New—National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC).

Background

A survey is proposed to determine audience awareness, knowledge, and uses of the *National Report on Human Exposure to Environmental Chemicals*.

The Division of Laboratory Sciences at the National Center for Environmental Health released the first of a series of biomonitoring reports, *The National Report on Human Exposure to Environmental Chemicals*, in March 2001. The next report is planned for late fall 2002. The first Report, published in 2001, established baseline data on 24 chemicals (metals, organophosphate pesticides, and phthalates) and trend data on lead, cadmium, and cotinine, which is a metabolite of nicotine. The 2002 Report will provide measurements

for at least 75 more chemicals, including new data on the 27 chemicals listed in the 2001 Report. Subsequent reports will add more chemicals and trend data on chemicals included in previously published reports.

A survey is proposed to determine target audiences' awareness of the report, knowledge about the contents of the report, and audience uses of data in the report. Target audiences who will be surveyed include: (1) Scientists conducting research in related fields; (2) State, local, and public health agencies

conducting health interventions and research on chemical exposures; (3) healthcare providers and other clinicians; and (4) local and State policy makers who regulate or make recommendations concerning uses and control of environmental chemicals.

The general purpose of the Report is "to provide unique exposure information to scientists, physicians, and health officials to help prevent disease that results from exposure to environmental chemicals." There is no cost to the respondents.

Respondents	Number of respondents	Number of responses/ respondent	Avg. burden/re-sponse (in hrs.)	Total burden (in hrs.)
Environmental Scientists	250	1	1	250
Public Health Officials	250	1	1	250
Health Care Providers	250	1	1	250
Policy Makers	250	1	1	250
Total				1,000

Dated: August 15, 2002.
