public with an additional 30 days in which to comment on the following information collection activities:

*Title:* Areas designated by Act of Congress, 30 CFR part 761.

OMB Control Number: 1029–0111
Summary: OSM and State regulatory
authorities use the information collected
under 30 CFR part 761 to ensure that
persons planning to conduct surface
coal mining operations on the lands
protected by section 522(e) of the
Surface Mining Control and
Reclamation Act of 1977 have the right
to do so under one of the exemptions or
waivers provided by this section of the
Act.

Bureau Form Number: None.
Frequency of Collection: Once.
Description of Respondents:
Applicants for certain surface coal mine
permits and State regulatory authorities.

Total Annual Responses: 262. Total Annual Burden Hours: 1,864.

*Title:* Requirements for Coal exploration, 30 CFR part 772.

OMB Control Number: 1029–0112. Summary: OSM and State regulatory authorities use the information collected under 30 CFR part 772 to maintain knowledge of coal exploration activities, evaluate the need for an exploration permit, and ensure that exploration activities comply with the environmental protection and reclamation requirements of 30 CFR parts 772 and 815 and section 512 of SMCRA (30 U.S.C. 1262).

Bureau Form Number: None. Frequency of Collection: Once. Description of Respondents: Persons planning to conduct coal exploration and State regulatory authorities.

Total Annual Responses: 905.
Total Annual Burden Hours: 8,510.
Title: Bond and Insurance
requirements for surface coal mining
and reclamation operations under
regulatory programs, 30 CFR part 800.

OMB Control Number: 1029–0043. Summary: The regulations at 30 CFR part 800 primarily implement section 509 of the Surface Mining Control and Reclamation Act of 1977, which requires that persons planning to conduct surface coal mining operations first post a performance bond to guarantee fulfillment of all reclamation obligations under the approved permit. The regulations also establish bond release requirements and procedures consistent with section 519 of the Act, liability insurance requirements pursuant to Section 507(f) of the Act, and procedures for bond forfeiture should the permittee default on reclamation obligations.

Bureau Form Number: None. Frequency of Collection: On Occasion. Description of Respondents: Surface coal mining and reclamation permittees and State regulatory authorities.

Total Annual Responses: 14,167. Total Annual Burden Hours: 166,114 hours.

Send comments on the need for the collections of information for the performance of the functions of the agency; the accuracy of the agency's burden estimates; ways to enhance the quality, utility and clarity of the information collections; and ways to minimize the information collection burdens on respondents, such as use of automated means of collections of the information, to the following addresses. Please refer to the appropriate OMB control numbers in all correspondence.

ADDRESSES: Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Department of Interior Desk Officer, 725 17th Street, NW., Washington, DC 20503. Also please send a copy of your comments to John A. Trelease, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Ave, NW., Room 210–SIB, Washington, DC 20240, or electronically to jtreleas@osmre.gov.

# Submission for OMB Review; Comment Request

September 26, 2002.

The Department of Labor (DOL) has submitted the following public

information collection request (ICR) to Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35). A copy of each individual ICR, with applicable supporting documentation, may be obtained by calling the Department of Labor. To obtain documentation contact Marlene Howze at (202) 693–4158 or e-mail Howze-Marlene@dol.gov.

Comments should be sent to Office of Information and Regulatory Affairs, Att: OMB Desk Officer for BLS, Office of Management and Budget, Room 10235, Washington, DC 20503 ((202) 395–7316), within 30 days from the date of this publication in the **Federal Register**.

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Type of Review: Reinstatement, with change, of a previously approved collection for which approval has expired.

*Agency:* Bureau of Labor Statistics (BLS).

*Title:* National Longitudinal Survey of Women.

OMB Number: 1220–0110. Affected Public: Individuals or households.

Frequency: Biennially.

Estimated Time Per Response and Total Burden Hours:

Form	Number of respondents	Total annual responses	Estimated minutes/re- sponse	Total annual burden (Hours)
2003 NLSW Pretest	50 6,627	50 6,627	70 70	
Re-interview	668	668	5	56

Form	Number of respondents	Total annual responses	Estimated minutes/response	Total annual burden (Hours)
Total	6,677	7,345		7,904

**Note:** The difference between the total number of respondents and the total number of responses reflects the fact that 668 respondents will be interviewed twice once in either the pretest or the main fielding and a second time in the quality-control re-interview. An additional 58 burden hours have been included for the main fielding to account for the possibility of having to interview the 50 women selected for the pre-test again in the main fielding in the unlikely event that the pre-test fails completely.

Total Annualized Capital/Startup Costs: \$0.

Total Annual Costs (operating/maintaining systems or purchasing services): \$0.

Description: Under Title 29 of the United States Code, Congress authorized the Bureau of Labor Statistics of the U.S. Department of Labor (Department) to collect labor statistics. The National Longitudinal Surveys (NLS) program is part of this effort. The data collected in the 2003 National Longitudinal Survey of Women (NLSW) will contribute to the knowledge about opportunities and services for younger women who desire to enter or re-enter the labor force. The Department will use this information to help understand and explain the employment activities, unemployment problems, and retirement decisions of women. The mature women currently are ages 66-80 and young women are ages 49-60. The 2003 NLSW is the only longitudinal survey designed to measure changes in the U.S. labor market for women born in years 1922-37 or 1943-53. No other source of data provides information on the extended time period covered by the NLSW, the wide variety of variables that it contains, and the characteristics of the sample. The 2003 NLSW will expand the existing socioeconomic data bank for women.

## Submission for OMB review; comment request

September 26, 2002.

The Department of Labor (DOL) has submitted the following public information collection requests (ICRs) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35). A copy of each ICR, with applicable supporting documentation, may be obtained by

calling the Department of Labor. To obtain documentation contact Darrin King at (202) 693–4129 or e-Mail *King-Darrin@dol. gov.* 

Comments should be sent to Office of Information and Regulatory Affairs, Attn: Stuart Shapiro, OMB Desk Officer for MSHA, Office of Management and Budget, Room 10235, Washington, DC 20503 ((202) 395–7316), within 30 days from the date of this publication in the **Federal Register**.

The OMB is particularly interested in comments which:

- \* Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- \* Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- \* Enhance the quality, utility, and clarity of the information to be collected; and
- \* Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

*Agency:* Mine Safety and Health Administration (MSHA).

Type of Review: Extension of a currently approved collection.

*Title:* Quarterly Mine Employment and Coal Production Report.

OMB Number: 1219–0006.

Affected Public: Business or other forprofit.

Frequency: Quarterly.

Number of Respondents: 24,604. Number of Annual Responses: 86,158. Estimated Time Per Response: 30 minutes for hardcopy filings and 15 minutes for electronic filings.

Total Burden Hours: 41,155. Total Annualized Capital/Startup Costs: \$0.

Total Annual Costs (operating/maintaining systems or purchasing services): \$27,236.

Description: The reporting and record keeping provisions in 30 CFR 50, Notification, Investigation, Reports and Records of Accidents, Injuries and Illnesses, Employment and Coal Production in Mines, are essential elements in MSHA's Congressional mandate to reduce work-related injuries and illnesses among the nation's miners.

Section 30 CFR 50.30(a) requires mine operators and independent contractors working on mine property to report quarterly employment and coal production to MSHA on Form 7000-2. MSHA tabulates and analyzes the information from this form along with data from MSHA Form 7000-1, Mine Accident, Injury, and Illness Report (OMB No. 1219-0007), to compute incidence and severity rates for various injury types. These rates are used to analyze trends and to assess the degree of success of the health and safety efforts of MSHA and the mining industry.

Employment and production data when correlated with accident, injury, and illness data provide information that allows MSHA to improve its safety and health enforcement programs, focus its education and training efforts, and establish priorities for its technical assistance activities in mine safety and health. Maintaining a current database allows MSHA to identify and direct increased attention to those mines, industry segments, and geographical areas where hazardous trends are developing.

MSHA Form 7000–2 is also a source of national coal production data, allowing MSHA to analyze the relationship between production and health and safety. Coal production data are also used to determine the sizes of coal mines for assessment purposes.

Section 103(d) of the Federal Mine Safety and Health Act of 1977 (Mine Act) requires operators to report employee hours worked. Section 103(h) of the Mine Act requires operators to keep any records and make any reports that are reasonably necessary for MSHA to perform its duties under the Mine Act.

Data collected through MSHA Form 7000–1 (OMB # 1219–0007) and MSHA Form 7000–2 enable MSHA to publish
