#### SUPPLEMENTARY INFORMATION:

**Background.**—The final phase of this investigation is being scheduled as a result of an affirmative preliminary determination by the Department of Commerce that imports of certain ball bearings and parts thereof from China are being sold in the United States at less than fair value within the meaning of section 733 of the Act (19 U.S.C. 1673b). <sup>1</sup>For purposes of this investigation, the Department of Commerce has defined the subject merchandise as "antifriction bearings, regardless of size, precision grade or use, that employ balls as the rolling element (whether ground or unground) and parts thereof (inner ring, outer ring, cage, balls, seals, shields, etc.) that are produced in China. Imports of these products are classified under the following categories: antifriction balls, ball bearings with integral shafts and parts thereof, ball bearings (including thrust, angular contact, and radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof. The scope includes ball bearing type pillow blocks and parts thereof; and wheel hub units incorporating balls as the rolling element. With regard to finished parts, all such parts are included in the scope of the petition. With regard to unfinished parts, such parts are included if (1) they have been heat-treated, or (2) heat treatment is not required to be performed on the part. Thus, the only unfinished parts that are not covered by the petition are those that will be subject to heat treatment after importation."
