BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Public Health Service****National Toxicology Program (NTP); National Institute of Environmental Health Sciences (NIEHS)**

The NTP Center for the Evaluation of Risks to Human Reproduction (CERHR) 1. Announces a Future Evaluation of Ethylene Glycol (CASRN: 107-21-1) and Propylene Glycol (CASRN: 57-55-6), 2. Requests Public Input on These Chemicals, and 3. Solicits the Nomination of Individuals Qualified to Serve on an Expert Panel.

Evaluation of Ethylene Glycol and Propylene Glycol

The CERHR plans to hold an expert panel evaluation of ethylene glycol (CASRN: 107-21-1) and propylene glycol (CASRN: 57-55-6). The exact date for this expert panel meeting is not yet set, but is tentatively planned for the fall of 2002. Additional details about the meeting, including the date and location, will be published in a future **Federal Register** notice.

The CERHR will convene an expert panel to evaluate the reproductive and developmental toxicity of ethylene glycol and propylene glycol. The expert panel will consist of approximately 12 scientists, selected for their scientific

expertise in various aspects of reproductive and developmental toxicology and other relevant areas of science. The expert panel meeting will be open to the public with time scheduled for oral public comment.

Ethylene glycol is a high production volume chemical used chiefly in antifreeze for heating and cooling systems. There is widespread exposure to ethylene glycol due to its use as an automotive antifreeze and as a de-icer for aircraft. The toxicology database on ethylene glycol includes recent mechanistic data and occupational exposure information. Propylene glycol, similar in structure to ethylene glycol, is used as an antifreeze, de-icing solution, and in various paints and coatings. Unlike ethylene glycol, propylene glycol is approved for use in various food additives, drugs, and cosmetics.

Request for Public Input

The CERHR invites input from the public and other interested parties on ethylene glycol and propylene glycol including toxicology information from completed and ongoing studies, information on planned studies, as well as information about current production levels, human exposure, use patterns, and environmental occurrence. Information and comments should be forwarded to the CERHR at P.O. Box 12233, MD EC-32, Research Triangle Park, NC 27709 (mail), (919) 541-3455 (phone), (919) 316-4511 (fax), or shelby@niehs.nih.gov (email). Information and comments received by May 6, 2002 will be made available to the CERHR staff and the expert panel for consideration in the evaluation.

The CERHR also invites nominations of qualified scientists to serve on the expert panel for the ethylene glycol/propylene glycol evaluation. Panelists are primarily drawn from the CERHR Expert Registry and/or the nomination of other scientists who meet the criteria for listing in that registry. Criteria for listing in the CERHR Expert Registry include: formal academic training and experience in a relevant scientific field, publications in peer-reviewed journals, membership in relevant professional societies, certification by an appropriate scientific Board or other entities, and participation in similar committee activities. All panel members serve as individual experts in their specific areas of expertise, not as representatives of their employer or other organization. Scientists on the expert panel will represent a wide range of expertise including developmental toxicology, reproductive toxicology, epidemiology, general toxicology, pharmacokinetics, exposure assessment, and biostatistics.

Nominations received by May 6, 2002 will be considered for the Ethylene Glycol/Propylene Glycol Expert Panel and inclusion in the CERHR Expert Registry. Nominations should be forwarded to the CERHR at the address given above.

Additional Information about CERHR

The NTP and the NIEHS established the CERHR in June 1998 [FR (Vol. 63, No. 239, p. 68782, December 1998)]. The purpose of the CERHR is to provide scientifically-based, uniform assessments of the potential for adverse effects on reproduction and development caused by agents to which humans may be exposed. The CERHR also serves as a resource for information on various environmental exposures and their potential to affect pregnancy and child development. Its Web site (<http://cerhr.niehs.nih.gov>) has information about common concerns related to fertility, pregnancy and the health of unborn children, and links to other resources for information about public health.

The CERHR follows a formal, open process for the selection and review of chemicals nominated for evaluation of potential reproductive and/or developmental hazards. This process includes an evaluation of the chemical(s) by an external scientific panel that follows specific guidelines in conducting its assessment and provides multiple opportunities for public input. As a final step in the process, the CERHR publishes a NTP-CERHR report on each chemical that includes the expert panel report, public comments, and a NTP brief. A summary of the review process was recently published in the **Federal Register** (Vol. 66, No. 136, pp. 37047-37048, July 16, 2001). The process and guidelines are posted on the CERHR Web site and are available in hard copy by contacting the CERHR (address provided above). The CERHR welcomes the nomination of chemicals to be considered for future evaluation or qualified scientists for its expert registry. These nominations can be made through the CERHR Web site or by contacting the CERHR directly (see address above).

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services notifies Federal agencies of the laboratories currently certified to meet standards of Subpart C of Mandatory Guidelines for Federal Workplace Drug Testing Programs (59 FR 29916, 29925). A notice listing all currently certified laboratories is published in the **Federal Register** during the first week of each month. If any laboratory's certification is suspended or revoked, the laboratory will be omitted from subsequent lists until such time as it is restored to full certification under the Guidelines.

If any laboratory has withdrawn from the National Laboratory Certification Program during the past month, it will be listed at the end, and will be omitted from the monthly listing thereafter.

This notice is also available on the internet at the following websites: <http://workplace.samhsa.gov>; <http://www.drugfreeworkplace.gov>.

FOR FURTHER INFORMATION CONTACT: Mrs. Giselle Hersh or Dr. Walter Vogl, Division of Workplace Programs, 5600 Fishers Lane, Rockwall 2 Building, Room 815, Rockville, Maryland 20857; Tel.: (301) 443-6014, Fax: (301) 443-3031.

SUPPLEMENTARY INFORMATION:

Mandatory Guidelines for Federal Workplace Drug Testing were developed in accordance with Executive Order 12564 and section 503 of Pub. L. 100-71. Subpart C of the Guidelines, "Certification of Laboratories Engaged in Urine Drug Testing for Federal Agencies," sets strict standards which laboratories must meet in order to conduct urine drug testing for Federal agencies. To become certified an applicant laboratory must undergo three rounds of performance testing plus an on-site inspection.

To maintain that certification a laboratory must participate in a quarterly performance testing program plus periodic, on-site inspections.

Laboratories which claim to be in the applicant stage of certification are not to be considered as meeting the minimum requirements expressed in the HHS
