Background Information about CERHR

The NTP established the NTP CERHR in June 1998 [**Federal Register**, December 14, 1998: Volume 63, Number 239, page 68782]. The CERHR is a publicly accessible resource for information about adverse reproductive and/or developmental health effects associated with exposure to environmental and/or occupational agents. The CERHR carries out assessments of these agents following a formal, multi-step, open process that includes rigorous evaluations by independent scientific panels in public forums and opportunities for public input. This process was published in the **Federal Register** (July 16, 2001: Volume 66, Number 136, pages 37047–37048) and is available on the CERHR Web site under *About CERHR* or in printed text from the CERHR.

The CERHR invites the nomination of agents for review or scientists for its expert registry. Information about CERHR and the nomination process can be obtained from its homepage (<http://cerhr.niehs.nih.gov>) or by contacting Dr. Shelby (contact information provided above). The CERHR selects chemicals for evaluation based upon several factors, including production volume, extent of human exposure, public concern, and published evidence of reproductive or developmental toxicity.
