ACTION: Notice of availability and requests for public comment.

SUMMARY: This notice announces the availability of and request comments on a revised Technical Standard Order (TSO)—C37e, VHF Radio Communications Transmitting Equipment Operating Within the Radio Frequency Range 117.975 to 137.000 Megahertz. The revised TSO tells manufacturers seeking TSO authorization or letter of design approval what minimum performance standards (MPS) their VHF radio communications transmitting equipment must first meet for approval and identification with the applicable TSO markings.

DATES: Submit comments on or before June 19, 2003.

ADDRESSES: Send all comments on the proposed TSO revision to: Federal Aviation Administration, Aircraft Engineering Division, Aircraft Certification Service, Room 815, AIR-130, 800 Independent Avenue, SW., Washington, DC 20591. SUPPLEMENTARY INFORMATION:**Comments Invited**

You are invited to comment on the proposed revised TSO listed in this notice by submitting written data, views, or arguments to the address listed above. Your comments should identify "Comments to TSO-C37e." You can examine all comments on the proposed revised TSO before and after the comment closing date at the Federal Aviation Administration, Room 815, 800 Independent Avenue, SW., Washington, DC 20591, weekdays except Federal holidays, between 8:30 a.m. and 4:30 p.m. The Director of the Aircraft Certification Service will consider all communications received on or before the closing date before issuing the final revised TSO.

Background

This proposed revision to TSO-C37d includes the latest TSO boilerplate language. This language incorporates a Functionality definition used to specify the Function Hazard Classification. Furthermore, the data required with the TSO application has been slightly modified to include:

a. The minimum operational performance standards defined by RTCA/DO-186A, "Minimum Operational Performance Standards for Airborne Radio Communications Equipment Operating Within the Radio Frequency Range 117.975-137.00 Mhz," Section 2.0, dated October 20, 1995, including Change 1, dated September 29, 1998, and Change 2, dated March 5, 2002.

b. The minimum requirements of 8.33 kHz channel spacing transmitters (Class 5 and 6) as defined by RTCA/DO-186A, including Changes 1 and 2, while retaining requirements of 25 kHz channel spacing transmitters (Class 3 and 4) of TSO-37d.

c. By reference to RTCA/DO-186A, including Channels 1 and 2, addresses the electromagnetic compatibility with the Global Navigation Satellite System (GNSS).

d. The environmental conditions and test procedures specified in RTCA/DO-160D, including Changes 1, 2, and 3.

The basic TSO provides minimum performance standards for VHF radio communications transmitting equipment. Incorporated within this standard are equipment characteristics that should be useful to users, designers, manufacturers, and installers of VHF

radio communications transmitting equipment.

Background

The FHWA, in cooperation with the Commonwealth of Puerto Rico Department of Transportation and Public Works (PRDTPW), through its

Highway and Transportation Authority (HTA), will prepare a joint environmental impact statement (EIS) on a proposal to construct a new roadway between the municipalities of Hatillo and Aguadilla.

Various environmental resources and issues are known to exist within the limits of the study area for this project. These resources and issues include, but are not limited to: location of prime agricultural land; archaeological resources; historic resources; residential, business and recreational land uses; geology; water quality; scenic viewsheds; native plant communities; wetlands; noise; and preservation of the natural, cultural, scenic and recreational values of the area. Any resources protected under Section 4(f) of the Department of Transportation Act¹ (49 U.S.C. 303 and 23 U.S.C. 138; 23 CFR 771.135(a)) will be addressed in a section 4(f) statement to be prepared for this project.

Section 106 of the National Historic Preservation Act (Pub. L. 89-665, 80 Stat. 915; 36 CFR part 800) applies to the project. Consultation pursuant to Section 106 is being initiated.

The EIS will address the impacts related to the construction of a new roadway in the Hatillo-Aguadilla Corridor. Recent planning efforts leading to the preparation of an EIS include development of design concepts for the following alternatives: (1) No Action; (2) Conversion to Expressway of existing road PR-2; (3) A New Road, and; (4) A combination of alternatives (2) and (3).

Correspondence describing this proposed action and requesting comments will be sent to appropriate Federal, Commonwealth, and local agencies and to private organizations and individuals that have previously expressed, or are known to have, an interest in this proposal. In addition, public scoping meetings will be held in the Spring/Summer of 2003.

To ensure that the full range of issues and alternatives related to this proposed action is addressed and all significant issues identified, comments and suggestions are invited from interested parties. Comments or questions concerning this proposed action should be directed to the FHWA at the address provided above. The view of agencies having interest on this proposal or

knowledge of potential effects on the environmental resources listed above is requested.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Pub. L. 104-13, § 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501-3520), and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60-days notice to the public for comment on information collection activities before seeking approval for reinstatement or renewal by OMB. 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1), 1320.10(e)(1), 1320.12(a).
