In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announces the following committee meeting:

Name: Advisory Board on Radiation and Worker Health (ABRWH), National Institute for Occupational Safety and Health (NIOSH).

Times and Dates: 8:30 a.m.-5 p.m., October 28, 2003. 8:30 a.m.-4:30 p.m., October 29, 2003.

Place: Adams Mark St. Louis, 315 Chestnut Street (at 4th Street), St. Louis, Missouri

63102, telephone (314) 241-7400, fax (314) 241-0889.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 120 people.

Background: The Advisory Board on Radiation and Worker Health ("the Board") was established under the Energy Employees Occupational Illness Compensation Program Act (EEOICPA) of 2000 to advise the President, through the Secretary of Health and Human Services (HHS), on a variety of policy and technical functions required to implement and effectively manage the new compensation program. Key functions of the Board include providing advice on the development of probability of causation guidelines which have been promulgated by HHS as a final rule, advice on methods of dose reconstruction which have also been promulgated by HHS as a final rule, evaluation of the scientific validity and quality of dose reconstructions conducted by the National Institute for Occupational Safety and Health (NIOSH) for qualified cancer claimants, and advice on the addition of classes of workers to the Special Exposure Cohort.

In December 2000, the President delegated responsibility for funding, staffing, and operating the Board to HHS, which subsequently delegated this authority to the CDC. NIOSH implements this responsibility for CDC. The charter was renewed on August 3, 2003 and the President has completed the appointment of members to the Board to ensure a balanced representation on the Board.

Purpose: This board is charged with (a) providing advice to the Secretary, HHS on the development of guidelines under Executive Order 13179; (b) providing advice to the Secretary, HHS on the scientific validity and quality of dose reconstruction efforts performed for this Program; and (c) upon request by the Secretary, HHS, advise the Secretary on whether there is a class of employees at any Department of Energy facility who were exposed to radiation but for whom it is not feasible to estimate their radiation dose, and on whether there is reasonable likelihood that such radiation doses may have endangered the health of members of this class.

Matters to be Discussed: Agenda for this meeting will focus on Program Status Reports from NIOSH, Department of Labor, and Department of Energy; Research Issues; Dose Reconstruction Workgroup Report; Scientific Issues Workgroup Report; and a closed session to discuss Independent Government Cost Estimates.

Agenda items are subject to change as priorities dictate.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both CDC, the Agency for Toxic Substances and Disease Registry.

Dated: October 2, 2003.

ACTION: Notice of final recommendations for protecting human health from potential adverse effects of exposure to agents GA, GB, and VX.

SUMMARY: Agents GA, GB, and VX are stored and are in the process of being destroyed by the Department of Defense (DoD). Public Law 91-121 and Public Law 91-441 (50 U.S.C. 1512) mandate that the Department of Health and Human Services (DHHS) review DoD plans for disposing of these munitions and make recommendations to protect public health.

EFFECTIVE DATE: January 1, 2005. An implementation period is necessary to allow the DoD to make program adjustments and allow time for changes to environmental permits as required.
