

5. *Project Evaluation*: The proposal should include a plan to evaluate the success of the IATP. ECA recommends that the proposal include a draft survey questionnaire or other technique, plus a description of methodologies that can be used to link outcomes to original project objectives. The applicant organization will be expected to submit periodic progress reports that elucidate the successes achieved, and obstacles encountered, by the IATP.

6. *Cost-Effectiveness and Cost Sharing*: The overhead and administrative components of the proposal, including salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. The proposal should maximize cost sharing through other private sector support as well as institutional direct funding contributions.

7. *Follow-on and Sustainability*: The proposal should provide a plan for continued follow-on activity that ensures that ECA-supported programs are not isolated events, but have meaning and scope beyond the time the actual exchange took place. The proposal should address the feasibility of sustaining viable IATP sites and training seminars after ECA funding ends.

SUPPLEMENTARY INFORMATION:

I. Scoping of Project

The FHWA and FTA in cooperation with the Colorado Department of Transportation (CDOT) and the Regional Transportation District (RTD) will prepare an Environmental Impact Statement and Section 4(f) Evaluation (EIS/4(f)) for transportation improvements on the US 36 Corridor (the Corridor) between Boulder and the Interstate 25 (I-25)/US 36 Interchange and a transit connection between Denver Union Station and Boulder.

The EIS/4(f) will evaluate improvement alternatives and the No-Action alternative based on the Purpose and Need developed for the corridor. Alternatives will be developed through an extensive agency and community outreach process. A full range of potential alignments and corridors will be considered for both highway and transit alternatives. The US 36 Corridor EIS/4(f) evaluation will result in a decision about which transportation projects, if any, will be built to improve safety and address congestion in the Corridor.

II. Description of Study Area and Project Need

The study area for the EIS/4(f) is generally along the alignments of US 36 from I-25 to Boulder, SH 157/Foothills Parkway from US 36 to SH 119, and along the BNSF Railroad line from downtown Denver to Boulder. The purpose of the proposed action is to decrease congestion, and improve safety, access, and mobility. Original construction of US 36 was initiated in 1951 and completed as a four-lane toll road. The cross section is still four lanes throughout most of the highway length today. During the same period, population and employment growth in
