I. Background

The Federal Energy Administration Act of 1974 (Pub. L. 93-275, 15 U.S.C. 761 *et seq.*) and the DOE Organization Act (Pub. L. 95-91, 42 U.S.C. 7101 *et seq.*) requires that EIA carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and long term domestic demands.

EIA provides the public and other Federal agencies with opportunities to comment on collections of energy information conducted by EIA. As appropriate, EIA also requests comments on important issues relevant to EIA's dissemination of energy information. Comments received help EIA when preparing information collections and information products necessary to EIA's mission.

EIA's Weekly Petroleum Status Report (WPSR) provides timely information on supply and selected prices of crude oil and principal petroleum products. It serves the industry, the press, planners, policymakers, consumers, analysts, and State and local governments with a ready, reliable source of current information.

The WPSR data are based primarily on weekly company submissions of information as of 7 am Eastern Standard Time (EST) Friday. Weekly data are filed with EIA by 5 pm EST on the following Monday. In the past, the WPSR data were publicly released electronically at 9 am EST each Wednesday, and the printed version was available on Friday. For weeks that included holidays, release of the WPSR was typically delayed by one day.

On December 3, 2002, EIA issued a Federal Register notice (67 FR 71959) requesting public comments on a proposed policy for changes in the release time of the WPSR. In that notice, EIA discussed the reasons for the proposed change and proposed moving the release time to 10:10 am EST on Wednesday to coincide with normal

New York Mercantile Exchange (NYMEX) and International Petroleum Exchange (IPE) trading hours. EIA also solicited suggestions for alternative release times.

II. Summary of Comments

In response to the Federal Register notice requesting comments on the proposed WPSR release time policy, EIA received 26 comments. The comments were from members of Congress, investment companies, state governments, and traders.

Comments fell into one of two categories: Either they were in favor of moving the release time or they favored keeping it at 9 am EST. Below is a brief summary of the major reasons given for supporting each category.

Comments in favor of the current release time included:

- Having the petroleum data available before the NYMEX opens allows the trading community to make qualified evaluations of the oil market before trading begins.

- For some in the non-commodities trading community receiving the data earlier gives them more timely information for their use.

Comments in favor of changing the release time included:

- Releasing the data when both the European and United States markets are open enhances fairness, efficiency, and competition by allowing a greater number of market participants equal trading access. It essentially levels the playing field.

- Releasing the EIA petroleum data while both markets are open will contribute to reduced market volatility and greater transparency. Releasing the data while more trading opportunities exist and more traders are operating reduces the likelihood that a small number of traders could create volatile price swings. Markets with greater liquidity are less likely to be manipulated.

- With current market turbulence, never has the need for market competition and transparency been greater. Important functions of market oversight by the Commodity Futures Trading Commission (CFTC) would be diminished if much of the business was shifted to overseas markets or the less regulated Over-the-Counter (OTC) markets.

- Maintaining the current release time could have the unintended effect of shifting important price discovery and risk management functions to an overseas market. The domestic market is made less relevant, and its benefits to consumers and the economy reduced, because businesses will be forced to

utilize markets open at the time, thus depriving them of an important competitive choice.

III. Current Actions

EIA WPSR Release Time Policy. EIA has established a policy for the release time of the WPSR. Under this policy, the WPSR will be publicly released electronically at 10:30 am EST each Wednesday. For weeks that include holidays, release of the WPSR will typically be delayed by one day.

EIA reserves the right to revisit or amend this policy. However, EIA shall not modify the WPSR release time policy without prior notification in the WPSR or the **Federal Register**.

Statutory Authority: Section 52 of the Federal Energy Administration Act (Pub. L. 93-275, 15 U.S.C. 790a).

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are interested in TPPC's information exchange relationship with EPA regarding important issues related to human health, environmental exposure to pesticides, and insight into EPA's decisionmaking process. All parties are invited and encouraged to attend the meetings and participate as appropriate.

This action is directed to the public in general, and may be of particular interest to those persons who are or may be required to conduct testing of chemical substances under the Federal Food, Drug, and Cosmetic Act (FFDCA), or the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket.* EPA has established an official public docket for this action under docket identification (ID) number OPP-2003-0041. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305-5805.

2. *Electronic access.* You may access this **Federal Register** document electronically through the EPA Internet under the "Federal Register" listings at <http://www.epa.gov/fedrgstr/>.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at <http://www.epa.gov/edocket/> to view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. Once in the system, select "search," then key in the appropriate docket ID number.
