

The DEIS analyzes leasing each of the five tracts (described above) as a separate Proposed Action. As part of the coal leasing process, BLM has identified and is evaluating other tract configurations for these tracts which add or subtract Federal coal to avoid bypassing coal or to increase estimated fair market value of the unleased Federal coal in this area. The tract configurations that BLM has identified for each tract are described and analyzed as alternatives in the DEIS. The DEIS also analyzes the alternative of rejecting each application to lease Federal coal as the No Action Alternative for each tract.

The agency-preferred alternative will vary for each tract, depending on which tract configuration is determined to best advance the public interest in avoiding bypassing Federal coal and obtaining the fair market value of the Federal coal.

The Proposed Actions and Alternatives being considered in the DEIS are in conformance with the "Approved Resource Management Plan for Public Lands Administered by the Bureau of Land Management Buffalo Field Office" (April 2001), the USDA Forest Service "Final EIS for the Northern Great Plains Management Plans Revision" (May 2001) and the BLM "Platte River Resource Area Resource Management Plan" (1985)

The USDA Forest Service (Forest Service) is a cooperating agency in the preparation of the DEIS. The surface of some of the land included for consideration for leasing in three of the tracts (NARO North, Little Thunder, and West Roundup) is National Forest System land administered by the Forest Service as part of the Thunder Basin National Grasslands.

The Office of Surface Mining Reclamation and Enforcement (OSM) is a cooperating agency in the preparation of the DEIS. If the tracts are leased as maintenance tracts, each new lease must be incorporated into the existing mining and reclamation plan for the adjacent mine and the Secretary of the Interior must approve each revision to the MLA (Mineral Leasing Act) mining plan for each mine before the Federal coal in each tract can be mined. OSM is the Federal agency that would be responsible for recommending approval, approval with conditions, or disapproval of the revised MLA mining plans to the office of the Secretary of the Interior if any or all of these tracts are leased.

Acting State Director.
