**History**

Federal Register Document 04-9076 published on Wednesday, April 21, 2004 (69 FR 21448), proposed to modify Class D airspace, and Class E airspace, at Rochester, MN. St. Cloud Regional Airport was incorrectly used in the legal description. This action corrects this error.

Accordingly, pursuant to the authority delegated to me, the legal description for the Class D airspace, and Class E airspace areas for Rochester, MN, as published in the **Federal Register** Wednesday, April 21, 2004 (69 FR 21448), (FR Doc. 04-9076), is corrected as follows:

**§ 71.1 [Corrected]**

1. On page 21449, column 2, under the sentence "Paragraph 6002 Class E airspace designated as surface areas", correct the legal description to read:

**AGL MN E2 Rochester, MN [Revised]**

Rochester International Airport, MN  
(Lat. 43°54'26"N., long. 92°29'56"W.)  
Rochester VOR/DME  
(Lat. 43°46'58"N., long. 92°35'49"W.)

Within a 4.3-mile radius of the Rochester International Airport, and within 3.1 miles each side of the Rochester VOR/DME 028° radial, extending the 4.3-mile radius to 7 miles southwest of the airport. This Class E airspace area is effective during the specific dates and times established by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

2. On page 21449, column 2, eliminated the sentence "Paragraph 6004 Class E airspace designated as an extension to a class D or Class E surface area", and the subsequent E4 legal description for St. Cloud, MN.

### The Proposal

The FAA is considering an amendment to the Code of Federal Regulations (14 CFR part 71) by establishing new Class E airspace at Shungnak, AK. The intended effect of this proposal is to establish Class E airspace upward from 700 ft. and 1,200 ft. above the surface, to contain Instrument Flight Rules (IFR) operations at Shungnak, AK.

The FAA Instrument Flight Procedures Production and Maintenance Branch has developed two new SIAPs for the Shungnak Airport. The new approaches are (1) Area Navigation (Global Positioning System) (RNAV GPS) Runway (RWY) 9, original; and (2) RNAV (GPS) Runway 27, original. A new Textual Departure Procedure will also be established. New Class E controlled airspace extending upward from 700 ft. and 1,200 ft. above the surface within the Shungnak Airport area would be created by this action. The proposed airspace is sufficient to contain aircraft executing the new instrument procedures for the Shungnak Airport.

The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 in FAA Order 7400.9L, *Airspace Designations and Reporting Points*, dated September 2, 2003, and effective September 16, 2003, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### Proposed Revision of Class E Airspace; King Salmon, AK

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This action proposes to revise Class E airspace at King Salmon, AK. Three new Standard Instrument Approach Procedures (SIAP's) are being published for the King Salmon Airport. An airspace review has determined that the existing Class E airspace at King Salmon is insufficient to contain aircraft executing the new SIAP's. Adoption of this proposal would result in additional Class E airspace upward from 1,200 feet (ft.) above the surface at King Salmon, AK. The airspace upward from 700 ft. above the surface would be unchanged.

**DATES:** Comments must be received on or before July 26, 2004.

**ADDRESSES:** Send comments on the proposal to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590–0001.
