

Programs in the Wildland-Urban Interface.

OMB Number: 0596–New.

Expiration date of approval: N/A.

Type of request: New.

Abstract: Forest Service and university researchers will contact recipients of a mail-phone-mail questionnaire to solicit information designed to help forest and fire managers understand value trade-offs regarding fire hazard reduction programs in the wildland-urban interface. Through those contacts researchers will evaluate the responses of Florida residents to different scenarios related to fire hazard reduction programs, determine how effective residents think the programs are, and calculate how much residents would be willing to pay to implement the alternatives presented to them. This will help researchers provide better information to natural resource, forest, and fire managers when they are contemplating the kind and type of fire hazard reduction program to implement to achieve forest land management planning objectives.

To gather the information, a stratified random sample of Florida residents will be contacted through a random digit dialing process to seek participation in the research study. Those who agree to participate will then be informed that a questionnaire will be sent to them and asked to provide an address to which to mail the questionnaire; they will be asked to answer a minimal set of questions to determine their pre-existing knowledge of fuels reduction treatments. They will also be asked to agree to a date and time for an in-depth interview related to the questionnaire mailed to them. Once the in-depth interview is completed no further contact will take place with participants.

The information will be collected by a university research survey center and will be analyzed by a Forest Service researcher and a researcher at a cooperating university who are experienced in applied economic nonmarket valuation research and survey research.

At present the Forest Service, Bureau of Land Management, Bureau of Indian Affairs, National Park Service, Fish and Wildlife Service, and many State agencies with fire protection responsibilities are planning to embark on an ambitious and costly fuels reduction program for fire risk reduction without a clear understanding of the public's opinion on which treatments are most effective or even desirable. Information collected in this research will help natural resource and fire

managers to better understand the public's opinions on fuels reduction activities.

Estimate of Annual Burden: The average annual burden estimated per respondent is 30 minutes, based on 1000 respondents at 5 minutes for the initial screener interview and 25 minutes of the in-depth interview.

Type of Respondents: Respondents will be a stratified random sample of heads of households.

Estimated Annual Number of Responses per Respondent: Only one response per respondent will be requested.

Estimated Total Annual Burden on Respondents: The annual burden on respondents that is estimated for this information collection is 30 minutes.

Comment Is Invited

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the function of the agency, including whether the information will have practical or scientific utility; (2) the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission request toward Office of Management and Budget approval.

Dated: June 18, 2004.

Background

Americans with Disabilities Act

The Architectural and Transportation Barriers Compliance Board (Access Board) is responsible for developing accessibility guidelines under the Americans with Disabilities Act (ADA)

of 1990 (42 U.S.C. 12101 *et seq.*) to ensure that facilities and vehicles covered by the law are readily accessible to and usable by individuals with disabilities.¹ The Department of Justice is responsible for issuing final regulations, consistent with the guidelines issued by the Access Board, to implement titles II and III (except for transportation vehicles and facilities). The Department of Transportation is responsible for issuing regulations to implement the transportation provisions of titles II and III of the ADA. Those regulations must also be consistent with the Access Board's guidelines.

On July 26, 1991, the Access Board published the Americans with Disabilities Act Accessibility Guidelines (ADAAG) for new construction and alterations in places of public accommodation and commercial facilities 36 CFR part 1191. ADAAG contains scoping provisions and technical specifications generally applicable to buildings and facilities (sections 1 through 4) and additional requirements specifically applicable to certain types of buildings and facilities covered by title III of the ADA: Restaurants and cafeterias (section 5); medical care facilities (section 6); mercantile and business facilities (section 7); libraries (section 8); and transient lodging (section 9). On September 6, 1991, the Access Board amended ADAAG to include additional requirements specifically applicable to transportation facilities (section 10).

On January 13, 1998, the Access Board published a final rule in the **Federal Register** which added two special application sections to ADAAG specifically applicable to certain types of State and local government buildings and facilities covered by title II of the ADA. (63 FR 2000) Those special application sections included section 11, which addresses Judicial, Legislative, and Regulatory Facilities and section 12, Detention and Correctional Facilities.

¹ The Access Board is an independent Federal agency established by section 502 of the Rehabilitation Act (29 U.S.C. 792) whose primary mission is accessibility for individuals with disabilities. The Access Board consists of 25 members. Thirteen are appointed by the President from among the public, a majority of whom are required to be individuals with disabilities. The other twelve are heads of the following Federal agencies or their designees whose positions are Executive Level IV or above: The departments of Health and Human Services, Education, Transportation, Housing and Urban Development, Labor, Interior, Defense, Justice, Veterans Affairs, and Commerce; the General Services Administration; and the United States Postal Service.
