No. 44-06939) located in Dickenson County, Virginia. The petitioner proposes to operate self-propelled electric face equipment without canopies in seam heights of 48 inches or less. [Docket No. M-2004-044-C]

Maple Creek Mining, Inc., 981 Route 917, Bentleyville, Pennsylvania 15314 has filed a petition to modify the application of 30 CFR 75.507 (Power connection points) to its High Quality Mine (MSHA I.D. The petitioner proposes to use low and medium volt, three phase, alternating current, non-permissible, submersible pump(s) in return and bleeder entries and sealed areas, conditioned upon the specific terms and conditions listed in this petition for modification. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard; pumps will be limited to low or medium voltages; and the pump motor will be maintained under water at all times to isolate it from the mine atmosphere.

The petitioner states that the checkpoints will be maintained in safe condition at all times; tests for methane and the quantity of air at each checkpoint will be determined weekly by a certified person; and the certified person will place his/her initials and date in a record book that will be kept on the surface and made available for inspection by interested persons. The certified person will also place his/her initials, and date on a date board at the checkpoint sites.
