

v. *NRDC*. 435 U.S. 519. 553 [1978]). Also, environmental objectives that could be raised at the draft EIS stage but that are not raised until after the completion of the final EIS may be waived or dismissed by the courts (*City of Angoon v. Hodel*, 803 F. 2d 1016, 1022 [9th Cir. 1986] and *Wisconsin Heritage, Inc. v. Harris*, 490 F. Supp. 1334 [E.D.Wis. 1980]). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period; so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final EIS.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft EIS should be as specific as possible. It is also helpful if the comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft EIS or the merits of alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provision of the National Environmental Policy Act (40 CFR 1503.3) in addressing these points.

Comments received in response to this solicitation, including names and addresses of those who comment, will be considered part of the public record on this proposed action and will be available for public inspection. Comments submitted anonymously will be accepted and considered; however, those who submit anonymous comments may not have standing to appeal the subsequent decision under 36 CFR part 215. Additionally, pursuant to 7 CFR 1.27(d), any person may request the agency to withhold a submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality. Persons requesting such confidentiality should be aware that, under the FOIA, confidentiality may be granted in only very limited circumstances, such as to protect trade secrets. The Forest Service will inform the requester of the agency's decision regarding the request for confidentiality, and where the request is denied, the agency will return the submission and notify the requester that the comments may be resubmitted with or without name and address within a specified number of days.

Comments on the draft EIS will be analyzed, considered, and responded to by the Forest Service in preparing the final EIS. The final EIS is scheduled to

be completed in February 2005. There will be four responsible officials for this multiforest EIS. Dale Hom, Forest Supervisor of the Olympic National Forest, Claire Lavendel, Forest Supervisor of the Gifford Pinchot National Forest, Gary Larsen, Forest Supervisor of the Mt. Hood National Forest, and Dan Harkenrider, Area Manager of the Columbia River Gorge National Scenic Area will share the duties of responsible official for this project. They will consider comments, responses, environmental consequences discussed in the final EIS, and applicable laws, regulations, and policies in making the decision and rationale for the decision in the Record of Decision. It will be subject to Forest Service Appeal Regulations (36 CFR part 215).

Dated: February 12, 2004.

Jim Golden,

Deputy Regional Forester, Pacific Northwest Region.

CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

Sunshine Act Meeting

In connection with its investigation into the cause of a deadly explosion and the leakage of 26,000 pounds of aqua ammonia into the atmosphere from the DD Williamson & Co., Inc. plant in Louisville, Kentucky on April 11, 2003, the United States Chemical Safety and Hazard Investigation Board announces that it will convene a Public Meeting beginning at 9:30 a.m. local time on March 12, 2004, at the Galt House, 140 North Fourth Street, Louisville, KY, 40202. Telephone: 502–568–5200.

At the meeting CSB staff will present to the Board the results of their investigation into this incident, including an analysis of the incident together with a discussion of the key findings, root and contributing causes, and draft recommendations. The CSB staff presentation will focus on three key safety issues: overpressure protection, hazard evaluation systems, and engineering at small facilities.

This incident occurred at 2:10 a.m. on Friday, April 11, 2003, when a vessel explosion at the DD Williamson plant killed an operator and caused extensive damage to the western end of the facility. As a consequence of the explosion, 26,000 pounds of aqua ammonia (29.4% ammonia solution in water) leaked into the atmosphere, forcing the evacuation of 26 residents. The DD Williamson plant employs approximately 45 people and is located

in a mixed industrial and residential neighborhood approximately 1.5 miles east of downtown Louisville.

Recommendations proposed in the investigative report are issued by a vote of the Board and address identified safety deficiencies uncovered during the investigation, and specifies how to correct the situation. Safety recommendations are the primary tool used by the Board to motivate implementation of safety improvements and prevent future incidents. The CSB uses its unique independent accident investigation perspective to identify trends or issues that might otherwise be overlooked. CSB recommendations may be directed to corporations, trade associations, government entities, safety organizations, labor unions and others.

After the staff presentation, the Board will allow a time for public comment. Following the conclusion of the public comment period, the Board will consider whether to vote to approve the final report and recommendations.

All staff presentations are preliminary and are intended solely to allow the Board to consider in a public forum the issues and factors involved in this case. No factual analyses, conclusions or findings should be considered final. Only after the Board has considered the staff presentation and approved the staff report will there be an approved final record of this incident.

The meeting will be open to the public. Please notify CSB if a translator or interpreter is needed, at least 5 business days prior to the public meeting. For more information, please contact the Chemical Safety and Hazard Investigation Board at (202) 261–7600, or visit our Web site at: <http://www.csb.gov>.
