

Register (70 FR 1881) that established a deadline of February 28, 2005, for transmittal of applications for the fiscal year ("FY") 2005 Indian Education Formula Grants to Local Educational Agencies. The purpose of this notice is to reopen the notice inviting applications, with a new deadline date for transmittal of applications for this program. A total of 96 current recipients that enroll approximately 16,600 Indian students did not submit their applications by the deadline. This year's deadline was several months earlier than usual, and some of those current grantees, who were focusing on assembling information required under their fiscal year 2004 grants, may not have understood that, during the months of January and February, they needed both to complete the submission of that information for their 2004 grants and to submit their fiscal year 2005 applications. The new deadline date for the transmittal of applications or amendments to applications already submitted is March 28, 2005.

DATES: The new deadline date for the transmittal of applications or amendments to applications already submitted, is March 28, 2005.

Please note the following:

- You must complete the electronic submission of your grant application by 4:30 p.m., Washington, DC time, on the application deadline date. The e-Application system will not accept an application for this program after 4:30 p.m., Washington, DC time, on the application deadline date. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the application process.

- The regular hours of operation of the e-Grants Web site are 6 a.m. Monday until 7 p.m. Wednesday; and 6 a.m. Thursday until midnight Saturday, Washington, DC time. Please note that the system is unavailable on Sundays, and between 7 p.m. on Wednesdays and 6 a.m. on Thursdays, Washington, DC time, for maintenance. Any modifications to these hours are posted on the e-Grants Web site.

BILLING CODE 4000-01-P

DEPARTMENT OF ENERGY

Recommendations for Sequencing Targets in Support of the Science Missions of the Office of Biological and Environmental Research (BER)

AGENCY: Office of Science; Office of Biological and Environmental Research; U.S. Department of Energy (DOE).

ACTION: Notice of recommendations for sequencing targets.

SUMMARY: This **Federal Register** Notice seeks the input and nominations of interested parties for candidate microbes, microbial consortia, and 250Mb-or-less-sized organisms for draft genomic sequencing in support of Office of Biological and Environmental Research (BER) programs, among them, the Genomics: GTL Program, the Climate Change Research Program, the Terrestrial Carbon Processes Program, the Natural and Accelerated Bioremediation Research (NABIR) Program, the Environmental Management Science Program (EMSP), the Ocean Science Program, and the Program for Ecosystem Research. Additional programs of relevance include the Energy Biosciences, and Nanoscale Science, Engineering and Technology Programs in the Office of Basic Energy Sciences. Nominated candidates should be relevant to DOE mission needs, e.g., organisms involved in environmental processes, including waste remediation, carbon management, and energy production. This announcement is not an offer of direct financial support for research on these organisms. Those nominations selected will result in the DNA sequence of selected organisms being determined at a draft level (6-8 X coverage) at the DOE Production Genomics Facility (PGF) at the Joint Genome Institute (JGI), (<http://www.jgi.doe.gov>). A subset of the selected organisms may be identified for sequence finishing. This announcement is designed to assist DOE in determining and prioritizing a list of microbes, microbial consortia, or modest-genome sized (not more than 250Mb) organisms (including eukaryotes) that address DOE mission needs. Following merit review, and a determination of satisfactory programmatic relevance, draft sequencing will be carried out at the PGF.

DATES: To assure consideration, nominations in response to this notice should be received by 4:30 p.m. (e.d.t.), July 14, 2005, to be accepted for merit review. It is anticipated that review will be completed early in the fall of 2005 with draft sequencing at the DOE PGF

to commence early in 2006, conditional upon the provision of high quality DNA.

ADDRESSES: Nominations responding to this notice should be sent to Dr. Daniel W. Drell, Office of Biological and Environmental Research, SC-72, Office of Science, U.S. Department of Energy, 1000 Independence Ave., SW., Washington, DC 20585-1290; e-mail is acceptable and encouraged for submitting nominations using the following addresses: kim.laing@science.doe.gov and daniel.drell@science.doe.gov.

FOR FURTHER INFORMATION CONTACT: Dr. Daniel W. Drell, SC-72, Office of Biological and Environmental Research, Office of Science, U.S. Department of Energy, 1000 Independence Ave. SW., Washington, DC 20585-1290, phone: (301) 903-4742, e-mail:

daniel.drell@science.doe.gov. The full text of this notice is available via the Internet using the following Web site address: <http://microbialgenome.org/>.

SUPPLEMENTARY INFORMATION: The DOE Office of Biological and Environmental Research supports fundamental research for a variety of missions (http://www.science.doe.gov/ober/ober_top.html). Relevant BER programs may include the the Genomics: GTL Program, the Climate Change Research Program, the Terrestrial Carbon Processes Program, the Natural and Accelerated Bioremediation Research (NABIR) Program, the Environmental Management Science Program (EMSP), the Ocean Science Program, and the Program for Ecosystem Science. Additional programs of relevance include the Energy Biosciences, and Nanoscale Science, Engineering and Technology Programs in the Office of Basic Energy Sciences. The Genomics:GTL Program, a partnership with the DOE Office of Advanced Scientific Computing Research, supports research into systems microbiology towards the comprehensive understanding of proteins and protein machines, gene regulatory networks, and microbial communities, and the development of computing and information infrastructure to enable a predictive understanding of biological systems. The Climate Change Research Program supports investigations of microbially-mediated fixation of atmospheric CO₂. The NABIR program supports research on microbial biotransformations and/or immobilization of metal and radionuclide wastes. The EMSP supports research into microbially-mediated biotransformations of DOE-relevant organic wastes such as chlorinated solvents. The Ocean
