

the Department of its final determination pursuant to section 735(b)(1)(A)(i) of the Act that an industry in the United States is materially injured by reason of less-than-fair-value imports of magnesium from Russia. Therefore, in accordance with section 736(a)(1) of the Act, the Department will direct U.S. Customs and Border Protection (CBP) to assess, upon further instruction by the Department, antidumping duties equal to the amount by which the normal value of the merchandise exceeds the export price (or the constructed export price) of the merchandise for all relevant entries of magnesium from Russia. These antidumping duties will be assessed on all entries of magnesium from Russia entered, or withdrawn from warehouse, for consumption on or after October 4, 2004, the date on which the Department published its notice of preliminary determination in the **Federal Register**. See *Notice of Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination: Magnesium Metal From the Russian Federation*, 69 FR 59197 (October 4, 2004) (*Preliminary Determination*).

Section 733(d) of the Act states that instructions issued pursuant to an affirmative preliminary determination may not remain in effect for more than four months except where exporters representing a significant proportion of exports of the subject merchandise request the Department to extend that four-month period to no more than six months. At the request of exporters that account for a significant proportion of the Russian exports of subject merchandise, we extended the four-month period to no more than six months. See *Preliminary Determination*. In this investigation, the six-month period beginning on the date of the publication of the *Preliminary Determination* ended on April 1, 2005. Furthermore, section 737 of the Act states that definitive duties are to begin on the date of publication of the ITC's final injury determination. Therefore, in accordance with section 733(d) of the Act and our practice, we will instruct CBP to terminate the suspension of liquidation and to liquidate, without regard to antidumping duties, unliquidated entries of magnesium from Russia entered, or withdrawn from warehouse, for consumption on or after April 2, 2005, and before the date of publication of the ITC's final injury determination in the **Federal Register**. Suspension of liquidation will continue on or after this date.

Effective on the date of publication of the ITC's final affirmative injury

determination, CBP officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as noted below. The all others' rate applies to all manufacturers and exporters of subject merchandise not specifically listed. The weighted-average dumping margins are as follows:

Manufacturer/exporter	Margin (percent)
JSC AVISMA Titanium-Magnesium Works	21.71
Solikamsk Magnesium Works ..	18.65
All Others'	21.01

Pursuant to section 736(a) of the Act, this notice constitutes the antidumping duty order with respect to magnesium metal from Russia. Interested parties may contact the Department's Central Records Unit, Room B-099 of the main Commerce Building, for copies of an updated list of antidumping duty orders currently in effect.

This order is issued and published in accordance with section 736(a) of the Act and 19 CFR 351.211.

Dated: April 12, 2005.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

National Institute of Standards and Technology

Announcement of a Meeting to Explore Feasibility of Establishing a NIST/ Industry Consortium on Gene Expression Metrology

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of public meeting.

SUMMARY: The National Institute of Standards and Technology (NIST) invites interested parties to attend a pre-consortium meeting on May 16, 2005 to be held on the NIST campus in Boulder, Colorado. The goal of the one-day meeting is to evaluate industry interest in creating a NIST/industry consortium focused on gene expression metrology. The goals of such a consortium would include the development of measurement methods of known quality for microarray gene expression results. The consortium would be supervised and administered by NIST. Consortium research and development would be

conducted by NIST staff members along with at least one technical representative from each participating member company. Membership in the Consortium is open to manufacturers of complete microarray gene expression systems (*i.e.* systems which include all components required to measure a genome-wide expression profile from isolated RNA). Consortium Members will be required to provide the NIST staff members with a complete system representative of their technology platform to support measurement and standards development. The initial term of the consortium is intended to be three years.

DATES: The meeting will take place on May 17, 2005, at 8 a.m. to 5 p.m. Interested parties should contact NIST to confirm their interest at the address, telephone number or FAX number shown below.

ADDRESSES: The meeting will take place at the National Institute of Standards and Technology (NIST), 325 Broadway Room 4550, Boulder, Colorado.

FOR FURTHER INFORMATION CONTACT: Marc Salit, Advanced Chemical Science Laboratory, Stop 8310, National Institute of Standards and Technology (NIST), Gaithersburg, MD 20899-8310. Telephone: (301) 975-3646; FAX: 301 975-5449; e-mail: salit@nist.gov.

SUPPLEMENTARY INFORMATION: Any program undertaken will be within the scope and confines of The Federal Technology Transfer Act of 1986 (Pub. L. 99-502, 15 U.S.C. 3710a), which provides federal laboratories including NIST, with the authority to enter into cooperative research agreements with qualified parties. Under this law, NIST may contribute personnel, equipment, and facilities but no funds to the cooperative research program. This is not a grant program.
