

Individual Monitoring of External and Internal Occupational Dose.” Specifically, 10 CFR 20.1502 requires licensees to provide radiation monitoring for all occupationally exposed individuals who might receive a dose in excess of 10 percent of the limits defined in 10 CFR 20.1201 or 20 percent of the limits defined in 10 CFR 20.1207 or 20.1208. To augment that provision, 10 CFR 20.2106, “Records of Individual Monitoring Results,” requires licensees to maintain records of the radiation exposures of all individuals for whom personnel monitoring is required pursuant to 10 CFR 20.1502. Also, according to 10 CFR 20.2104, “Determination of Prior Occupational Dose,” licensees shall determine the dose in the current monitoring year for all persons who must be monitored, and attempt to obtain the records of cumulative occupational radiation dose. In addition, 10 CFR 20.2104(b) requires that, prior to permitting an individual to participate in a planned special exposure, licensees shall determine the internal and external doses from all previous planned special exposures, and record all previous doses in excess of the limits received during the lifetime of the individual. Licensees are required to maintain prior dose records on NRC Form 4 or its equivalent. Further, 10 CFR 20.2206, “Reports of Individual Monitoring,” requires certain licensees to submit to the NRC an annual report of the results of individual monitoring. Licensees are required to record these annual reports on NRC Form 5 or its equivalent.

The NRC is issuing this proposed revision to make the guide consistent with a recent change to 10 CFR 20.2206, which allows electronic submittal of licensees’ annual occupational radiation dose data via the NRC’s Radiation Exposure Information and Reporting System (REIRS) for Radiation Workers (a secure Web site) at <http://www.reirs.com>. Other changes include updating NRC Forms 4 and 5, and clarifying and improving the guide to reflect licensees’ input and experience since the NRC issued Revision 1 of Regulatory Guide 8.7 in 1992.
