Background

On April 1, 2005, a petition was filed with the Commission and Commerce by Tara Materials Inc., Lawrenceville, Georgia, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV imports of artists' canvas from China. Accordingly, effective April 1, 2005, the Commission instituted antidumping duty investigation No. 731–TA–1091 (Preliminary).

Notice of the institution of the Commission's investigation and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the Federal Register of April 6, 2005 (70 FR 17467). The conference was held in Washington, DC, on April 22, 2005, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on May 16, 2005. The views of the Commission will be contained in USITC Publication 3777 (May 2005), entitled Artists' Canvas from China: Investigation No. 731–TA–1091 (Preliminary).

Issued: May 16, 2005.

By order of the Commission.

SUPPLEMENTARY INFORMATION:

Title of Collection: Survey of Graduate Students and Postdoctorates in Science and Engineering.

OMB Approval Number: 3145-0062.

Proposed Project

Graduate students in science. engineering, and health-related fields in U.S. colleges and universities, by source and mechanism of support and by demographic characteristics. An electronic/mail survey, the Survey of Graduate Students and Postdoctorates in Science and engineering originated in 1966 and has been conducted annually since 1972. The survey is the academic graduate enrollment component of the NSF statistical program that seeks to "provide a central clearinghouse for the collection, interpretation, and analysis of data on the availability of, and the current and projected need for. scientific and technical resources in the United States, and to provide a source of information for policy formulation by other agencies of the Federal government" as mandated in the National Science Foundation Act of 1950.

The proposed project will continue the current survey cycle for three years. The annual Fall surveys for 2005 through 2007 will survey the universe of 712 reporting units (schools) at 592 graduate degree-granting institutions. There are 12, 262 departments at these schools that offer accredited graduate programs in science, engineering or health. The survey has provided continuity of statistics on graduate school enrollment and support for graduate students in all science & engineering (S&E) and health fields, with separate data requested on demographic characteristics (race/ ethnicity and gender by full-time and part-time enrollment status). Statistics from the survey are published in NSF's annual publication series Graduate Students and Postdoctorates in Science and Engineering, in NSF publications Science and Engineering Indicators, Women, Minorities, and Persons with Disabilities in Science and Engineering. and are available electronically on the World Wide Web.

The survey will be sent primarily to the administrators at the Institutional Research Offices. To minimize burden, NSF instituted a Web-based survey in 1998 through which institutions can enter data directly or upload preformatted files. The Web-based survey includes a complete program for editing and trend checking and allows institutions to receive their previous vear's data for comparison. Respondents will be encouraged to participate in this Web-based survey should they so wish. Traditional paper questionnaires will also be available, with editing and trend checking performed as part of the survey processing. In the currently

ongoing Fall 2004 GSS survey, preliminary data indicate that 95% of the institutions are submitting the data on the Web-based data collection system. During the 2003 GSS survey cycle, 87% of the institutions used the Web-based data collection system.

The Fall 2003 GSS achieved a total response rate of 99.4 percent for institutions and 99.0 percent for departments. Response rates are not yet available for the currently ongoing Fall 2004 survey.

Estimate of Burden: Respondents: Individuals. Estimated Number of Responses: 12,262.

Estimated Total Annual burden on Respondents: 39,235 hours.

Frequency of Responses: Annually.

Dated: May 19, 2005.

Reports Clearance Officer, National Science Foundation.
