Docket Number: 05-018. Applicant: Oregon Health and Science University, Neurological Sciences Institute, 5050 N.W. 185th Avenue, Beaverton, OR 97006. Instrument: TriMScope Beam Multiplexor System. Manufacturer: La Vision BioTech GmbH, Germany. Intended Use: The instrument is

intended to be used to study the anatomy and physiology of the animal brain at the subcellular level and the optical correlates of its electrical activity in order to resolve the fine structural alterations after global brain ischemia, prior to neuronal death, to identify early timepoints in which therapies can be delivered to prevent brain death. It will employ multiple infrared light beams prior to their passage through a microscope to illuminate the subsurface of the brain at a discrete focal plane. Application accepted by Commissioner of Customs: May 23, 2005.

Docket Number: 05-020. Applicant: University of California, San Diego, 9500 Gilman Drive, La Jolla, CA 92093-0332. Instrument: Electron Microscope, Model Technai G² Sphera Manufacturer: FEI Company, The Netherlands. Intended Use: The instrument is intended to be used to image and study, among other things:

1. The structure and the mechanisms of action of various viruses.
2. Cell motility and adhesion of ventral membrane preparations of fibroblast cells.
3. The function of MsbA in membrane transport with drug-resistant bacteria.
4. Intercellular communication involving connexin protein and its function in x-linked diseases.

5. Trans-membrane signaling within human platelet protein integrin.

These studies will use low-dose cryoelectron microscopy techniques. Application accepted by Commissioner of Customs: June 8, 2005.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*) imposed prohibitions against the taking of endangered species. Section 10 of the ESA allows permits authorizing the taking of endangered species for research/enhancement purposes. The corresponding regulations established procedures for persons to apply for such permits. In addition, the regulations set forth specific reporting requirements for such permit holders.

The regulations contain two sets of information collections: (1) Applications for research/enhancement permits, and (2) reporting requirements for permits issued.

The required information is used to evaluate the impacts of the proposed activity on endangered species, to make the determinations required by the ESA prior to issuing a permit, and to establish appropriate permit conditions. To issue permits under ESA section 10(a)(1)(A), the National Marine Fisheries Service (NMFS) must determine that (1) such exceptions were applied for in good faith, (2) if granted and exercised will not operate to the disadvantage of such endangered species, and (3) will be consistent with the purposes and policy set forth in section 2 of the ESA.

The currently approved application and reporting requirements are being revised to apply only to Pacific salmon and steelhead, as requirements regarding other species are being addressed in a separate information collection. Clarification of some of the narrative will also be provided, based on previous applicants' responses and submitted applications and reports.

II. Method of Collection

Respondents have a choice of either electronic or paper forms. Methods of submittal include e-mail of electronic forms, and mail and facsimile transmission of paper forms.
