Numbers of Marine Mammals Expected to be Harassed

The number of animals taken by Level B harassment during fireworks displays is expected to vary due to factors such as tidal stage, seasonal shifting prey stocks, climatic phenomenon (such as el Nino events), and the number, timing, and location of future displays. At all four designated display sites combined, twenty fireworks events per year could harass an average annual total of 2,630 California sea lions (6,170 maximum) and an average annual total of 302 harbor seals (1,065 maximum) within the MBNMS. These numbers are small relative to the population sizes of these species. Please refer to the MBNMS Fireworks Assessment Report (2001) for further information regarding estimated incidental take numbers by display area and fireworks events (see **ADDRESSES**).

Possible Effects of Activities on Marine Mammal Habitat

NMFS anticipates no loss or modification to the habitat used by California sea lions or Pacific harbor seals that haul out in the MBNMS. The pinniped haul-out sites in MBNMS where fireworks displays will occur are not used as breeding, molting, or mating sites during the fireworks displays; therefore, it is not expected that the covered activities will have any impact on the ability of California sea lions or Pacific harbor seals in the area to reproduce. Additionally, MBNMS fireworks permit conditions include requirements for applicants to clean up debris subsequent to all displays.

Possible Effects of Activities on Subsistence Needs

There are no subsistence uses for Pacific harbor seals in California waters, and thus, there are no anticipated effects on subsistence needs.

Endangered Species Act

The MBNMS consulted with the USFWS pursuant to Section 7 of the ESA regarding impacts to southern sea otters. The USFWS issued a biological opinion on June 22, 2005, which concluded that the authorization of fireworks displays, as proposed, is not likely to jeopardize the continued existence of southern sea otters or to destroy or adversely modify any listed critical habitat. The USFWS further found that MBNMS would be unlikely to take any southern sea otters, and

therefore issued neither an incidental take statement nor an IHA.

National Environmental Policy Act

NOAA prepared a Final Environmental Impact Statement and Master Plan for the MBNMS in June 1992. Subsequent to MBNMS' application for an IHA, NMFS prepared an Environmental Assessment on the Issuance of an Incidental Harassment Authorization for Coastal Commercial Fireworks Displays Authorized Within the Monterey Bay National Marine Sanctuary. A Finding of No Significant Impact was issued on June 30, 2005.

Conclusions

NMFS has determined that the short-term impact of fireworks displays, as described in this document and in the application for an IHA, would result in no more than Level B harassment of small numbers of California sea lions and harbor seals. The effects of coastal fireworks displays will be limited to short term and localized changes in behavior involving small numbers of pinnipeds. Although sea lions and seals may modify their behavior, including temporarily vacating haulouts to avoid the sight and sound of commercial fireworks, these fireworks are expected to have no more than a negligible impact on these stocks. No take by injury and/or death is anticipated, and harassment takes will be at the lowest level practicable due to incorporation of the mitigation measures mentioned previously in this document. Additionally, the MBNMS fireworks displays will not have an unmitigable adverse impact on the availability of marine mammal stocks for subsistence use, as there are no subsistence uses for California sea lions or Pacific harbor seals in California waters.

Authorization

NMFS has issued a 1-year IHA to the MBNMS for the take of California sea lions and Pacific harbor seals, by harassment, incidental to coastal fireworks displays permitted within the MBNMS, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

SUPPLEMENTARY INFORMATION:

Authority

Issuance of permits, as required by the Endangered Species Act of 1973 (16 U.S.C. 1531-1543) (ESA), is based on a finding that such permits/modifications: (1) are applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are

consistent with the purposes and policies set forth in section 2 of the ESA. Authority to take listed species is subject to conditions set forth in the permits. Permits are issued in accordance with and are subject to the ESA and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 222–226).

Those individuals requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the permit action summaries are those of the applicant and do not necessarily reflect the views of NMFS.

Species Covered in This Notice

This notice is relevant to the following threatened salmonid ESU: SONCC coho salmon (*Oncorhynchus kisutch*).

Permit Requests Received

Permit 1534

Siskiyou Resource Conservation District (RCD) has requested a Permit 1534 for take of juvenile SONCC coho salmon, to determine the timing of salmonid migration from tributaries to the Scott River Mainstem for winter rearing and/or out-migration. Additionally, trapping will allow for the study of fish condition, population estimates, and participation in cooperative studies with downstream trapping programs. RCD proposes to use in-stream trapping as the method of capture. RCD has requested non-lethal take of 3,530 juvenile SONCC coho salmon. Permit 1534 will expire August 1, 2006.

Permit 1539

The Rowdy Creek Fish Hatchery has requested a Permit 1539 for take of SONCC coho salmon, in the Klamath River (Rowdy Creek). The Rowdy Creek Fish Hatchery proposes to capture adult salmon and steelhead by an in-stream weir. Rowdy Creek Fish Hatchery has requested non-lethal take of up to: 50 adult SONCC coho salmon. Permit 1539 will expire March 1, 2015.

Dated: June 30, 2005.
