

(Weekly examination) to its Whitetail K-Mine (MSHA I.D. No. 46-08751) located in Preston County, West Virginia. The petitioner proposes to have a certified person conduct weekly examination of the East Mains 1-Right and 2-Right panels for quantity, quality, and direction of the air and record the results of the examinations in a book that will be made available for interested persons. The petitioner states that due to deteriorating roof and numerous falls in the East Mains 1-Right and 2-Right panels, to travel the areas in their entirety would be unsafe; that all approaches inby the inlet and outlet areas into the East Mains 1-Right and 2-Right panels will be endangered off; and that the proposed alternate method will provide adequate air evaluation of the worked out areas and limit the exposure of hazards to the person conducting the examinations. The petitioner asserts that the proposed alternative method will provide at least the same measure of protection as the existing standard.

[Docket No. M-2005-045-C]

Energy West Mining Company, P.O. Box 310, Huntington, Utah 84528 has filed a petition to modify the application of 30 CFR 75.350 (Belt air course ventilation) to its Deer Creek Mine (MSHA I.D.
