The Responsible Official is Connie Clementson, District Ranger, Grand Valley Ranger District, 2777 Crossroads Blvd. Unit 1, Grand Junction, CO 81506.

Nature of Decision To Be Made

The Responsible Official will review the supplemental information and determine if the 2001 Record of Decision should be modified or if the original decision is to remain in effect and unchanged.

Scoping Process

Extensive public involvement has occurred on this project over the last 13 years in the form of news releases, field tours and public meetings. No additional scoping is planned for this supplement.

Comment Requested

A legal notice will be published in the newspaper of record and a Notice of Availability will be published in the **Federal Register** to inform the public that supplemental information is available for review and comment. The draft supplemental environmental impact statement will be distributed to all parties that received the 2001 final supplemental environmental impact statement and record of decision and to those parties that filed an appeal of the 2001 decision.

Early Notice of Importance of Public Participation in Subsequent Environmental Review

A draft supplemental environmental impact statement will be prepared for comment. The comment period on the draft supplemental environmental impact statement will be 45 days from

the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.
