This draft guidance provides recommendations on what chemistry, manufacturing, and controls information sponsors should include regarding reporting, identification, qualification, and setting acceptance criteria for impurities that are classified as degradation products in drug products when submitting an abbreviated new drug application (ANDA) or supplement to support changes in drug substance synthesis or process, formulation of the drug product, the manufacturing process, or components of the container/closure system.

SUPPLEMENTARY INFORMATION:**I. Background**

In the **Federal Register** of January 5, 1999 (64 FR 516), FDA published the draft guidance for industry on "ANDAs: Impurities in Drug Products." The draft guidance provided recommendations for including information in ANDAs and ANDA supplements about the reporting, identification, qualification of, and setting acceptance criteria for degradation products in drug products that are manufactured from drug substances produced by chemical synthesis.

FDA is announcing the availability of a revised draft guidance for industry entitled "ANDAs: Impurities in Drug Products," which revises the January 5, 1999, draft guidance. The draft guidance is being revised to update information on listing of degradation products, setting acceptance criteria, and qualifying degradation products in conformance with our current thinking and the revision of the International Conference on Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use (ICH) guidance for industry on "Q3B(R) Impurities in New Drug Products," published in November 2003. The draft guidance is also being revised to remove sections of the guidance containing recommendations that are no longer needed because they are addressed in the more recent Q3B(R).

This draft guidance contains information collection provisions that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). The collection of information in this draft guidance was approved under OMB Control No. 0910-0001.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the agency's current thinking on these topics. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

Annual Certification of Cook Inlet Regional Citizen's Advisory Council (CIRCAC)**AGENCY:** Coast Guard, DHS.**ACTION:** Notice of recertification.

SUMMARY: Under the Oil Terminal and Tanker Environmental Oversight Act of 1990, the Coast Guard may certify on an annual basis an alternative voluntary advisory group in lieu of a regional citizens' advisory council for Cook Inlet, Alaska. This certification allows the advisory group to monitor the activities of terminal facilities and crude oil tankers under the Cook Inlet Program established by the statute. The purpose of this notice is to inform the public that the Coast Guard has recertified the alternative voluntary advisory group for Cook Inlet, Alaska.

DATES: This recertification is effective for the period from September 1, 2005 through August 31, 2006.

FOR FURTHER INFORMATION CONTACT: For general information regarding the CIRCAC or viewing material submitted to the docket, contact Rick Janelle, Seventeenth Coast Guard District, Marine Safety Division, (907) 463-2808.

SUPPLEMENTARY INFORMATION: In section 5002 of the Oil Pollution Act of 1990, cited as the Oil Terminal and Tanker Environmental Oversight and Monitoring Act of 1990 (the Act), Congress sought to foster the long-term partnership among industry, government, and local communities in overseeing compliance with the environmental concerns in the operation of terminal facilities and

crude-oil tankers. Subsection 5002(o) permits an alternative voluntary advisory group to represent to communities and interests in the vicinity of the terminal facilities in Cook Inlet (CI), in lieu of a council of the type specified in subsection 5002(d), if certain conditions are met.

The Act requires that the group enter into a contract to ensure annual funding, and that it receive annual certification by the President to the effect that it fosters the general goals and purposes of the Act, and is broadly representative of the communities and interests in the vicinity of the terminal facilities and Cook Inlet. Accordingly, in 1991, the President granted certification to the Cook Inlet Regional Citizen's Advisory Council (CIRCAC). The authority to certify alternative advisory groups was subsequently delegated to the Commandant of the Coast Guard and redelegated to the Commander, Seventeenth Coast Guard District.

On June 28, 2005, the Coast Guard published a notice of availability of an application for recertification submitted by the Cook Inlet Regional Citizens' Advisory Council in the **Federal Register** (70 FR 37103) and we requested comments. Eight comments were received.

Discussion of Comments

Of the comments received, all were supportive of recertification and noted the positive efforts, good communication, and broad representation of Cook Inlet communities by CIRCAC as it carries out its responsibilities as intended by the Act.

The Coast Guard received one letter of public comment from the Cook Inlet Keeper, a citizen-based, non-profit group dedicated to protecting Alaska's Cook Inlet watershed. This comment supported the recertification of the CIRCAC and also encouraged the Coast Guard to investigate ways to ensure the CIRCAC has a more reliable, long-term funding stream. Although the Coast Guard understands the Cook Inlet Keeper's concern, the Coast Guard is limited to determining whether the CIRCAC has entered into a contract for funding in accordance with the requirements of 33 U.S.C. 2732(o), and reviewing the expenditure of those funds.

Upon review of the comments received regarding the CIRCAC's performance during the past year and the information provided by the RCAC in their annual report and recertification package, the Coast Guard finds the CIRCAC meets the criteria established under the Oil Pollution Act, and that

recertification in accordance with the Act is appropriate.

Recertification

By letter dated 12 August, 2005 the Commander, Seventeenth Coast Guard, certified that the CIRCAC qualifies as an alternative voluntary advisory group under 33 U.S.C. 2732(o). This recertification lasts through August 31, 2006.

Dated: August 15, 2005.

James C. Olson,

Rear Admiral, U.S. Coast Guard, Commander, Seventeenth Coast Guard District.
