*Title:* NESHP for Miscellaneous Metal Parts and Products (Renewal).

*Abstract:* This National Emission Standards for Hazardous Air Pollutants (NESHP) requires initial notification, performance tests, and periodic reports. Owners or operators also are required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required, in general, of all sources subject to NESHP.

Any owner or operator subject to the provisions of this part shall maintain a

file of these documents, and retain the file for at least five years following the date of such notifications, reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, Subpart MMMM as authorized in Sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined not to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

*Burden Statement:* The annual public reporting and recordkeeping burden for this collection of information is estimated to average 198 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to adjust the existing ways to comply with any previously applicable instructions and requirements; to train personnel to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information.

*Respondents/Affected Entities:* Miscellaneous metal parts and products surface coating facilities.

*Estimated Number of Respondents:* 1,680.

*Frequency of Response:* Initial, Semiannually, On Occasion.

*Estimated Total Annual Hour Burden:* 675,050 hours.

*Estimated Total Annual Costs:* \$56,642,905, which includes \$1,667,000 annualized capital/startup costs, \$500,000 annual O&M costs, and \$54,475,905 annual labor costs.

*Changes in the Estimates:* There is an increase of 535,670 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to the recalculation of burden reflecting

activities undertaken by facilities to comply with 40 CFR part 63, subpart MMMM over the three year period covered by this ICR.

Dated: August 23, 2005.
