D. How Should I Submit CBI to the Agency?

Do not submit information that you consider to be CBI electronically through EPA Dockets or by e-mail. You may claim information that you submit to EPA as CBI by marking any part or all of that information as CBI (if you submit CBI on disk or CD ROM, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket and EPA Dockets. If you submit the copy that does not contain CBI on

disk or CD ROM, mark the outside of the disk or CD ROM clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and EPA Dockets without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

II. Background

What Action is the Agency Taking?

Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), at the discretion of the Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the Administrator determines that emergency conditions exist which require the exemption. The Minnesota and South Dakota Departments of Agriculture have requested the Administrator to issue a quarantine exemption for the use of metconazole (Caramba 90SL) and a metconazole + pyraclostrobin co-pack (Headline-Caramba co-pack) on soybeans to control Asian soybean rust. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the Applicant asserts that most of the 73.8 million soybean acres planted in the United States could be compromised by Asian soybean rust. A variety of published reports have indicated that soybean rust is capable of causing yield reductions area-wide on soybeans from 10% to 50% and in selected fields greater than 90%. Due to the large acreage potentially impacted, registrants have informed the states that no single product will be available in sufficient quantity to treat the potential land area impacted by Asian soybean rust. Nationally, soybeans account for 73.8 million planted acres, 2.75 billion bushels produced, and over 13 billion value of production. Even a modest 4% minimal loss of production could reduce domestic soybean production to its lowest point in the preceding 5 years. According to the quarantine exemption request, several products have emerged as potentially efficacious against Asian soybean rust in international trials, including metconazole. Metconazole is a systemic, triazole fungicide that can be used as a systemic eradicant and a protectant with post-infection activity that can stop pathogen establishment in the early phases of disease development.

As part of this quarantine exemption request, the Applicant proposes a maximum of 2 applications of the 8.6% metconazole formula (Caramba 90SL)

per season at an application rate of 0.96–1.14 ounces of active ingredient/acre (8.2–9.6 fluid ounces of product per acre) of soybeans treated. In addition, the Applicant proposes the use of 1 application of the 32.2% (8.6% metconazole + 23.6% pyraclostrobin) metconazole + pyraclostrobin co-pack (Headline-Caramba co-pack) per season at an application rate of 1.89 ounces of active ingredient (0.72 ounces of metconazole + 1.17 ounces of pyraclostrobin)/acre (9.64 fluid ounces of product per acre) of soybeans treated. Ground and aerial applications are requested for both products. If granted, the use of Caramba 90SL on soybeans would result in approximately 0.05–0.06 million pounds of active ingredient used per 1 million soybean acres treated. Further, the use of the (Headline-Caramba co-pack) on soybeans would result in approximately 0.10 million pounds of active ingredients used per 1 million soybean acres treated.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 of FIFRA require publication of a notice of receipt of an application for a quarantine exemption proposing "use of a new chemical (i.e., an active ingredient) which has not been registered by EPA." This notice provides an opportunity for public comment on the application.

The Agency, will review and consider all comments received during the 15-day public comment period in determining whether to issue the quarantine exemption requested by the Minnesota and South Dakota Departments of Agriculture.
