SUPPLEMENTARY INFORMATION: The subject amendment is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

Permit No. 774-1649-02, issued to the NMFS, Southwest Fisheries Science Center, authorizes the Holder to capture and restrain 100 adults/juveniles and 600 Antarctic fur seal (*Arctocephalus gazella*) pups to: handle (weigh and measure); sample (extract tooth, blood, and milk); and tag (flipper tag and instrument). Additionally, the Permit authorizes incidental harassment of Southern elephant seals (*Mirounga leonina*), Crabeater seals (*Lobodon carcinophagus*), Leopard seals (*Hydrurga leptonyx*), Ross seals (*Ommatophoca rossii*), and Weddell seals (*Leptonychotes weddellii*) during census surveys and mortality of up to three Antarctic fur seals incidental to capture operations. The Permit expires April 30, 2006.

The Holder now requests an amendment to the Permit to conduct additional activities on 15 Antarctic fur seal females and 30 pups already authorized to be taken. There would be no change in the total number of animals captured or the number of captures per animal each year. Adult females and pups would be administered isotopes (doubly-labeled water (DLW)) for female/pup energetic studies. Blood samples would be collected pre- and post administration of isotopes. Seals would be held up to three hours and the female and pup released simultaneously. Additionally, pups would be lavaged to remove milk from their stomachs before the administration of DLW.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding a copy of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: September 26, 2005.
