Draft Fishery Ecosystem Plan Public Hearings

At its 123rd meeting (June 2004), the Council initiated a process to develop fishery ecosystem plans (FEPs), thereby managing fisheries within an ecosystem context. Between October and December 2004, the Council conducted scoping meetings throughout the region to solicit input on establishing a preliminary range of alternatives to develop a Programmatic Environmental Impact Statement which will serve as a broad-range planning tool for the Council's development and implementation of FEP. Based on comments received during scoping, as well as other planning activities, the Council is seeking public input on the following issues related to the development of draft FEPs:

1. FEP Objectives;
2. FEP Boundaries;
3. FEP Management Unit Species;
4. Council process relating to advisory body structure; and
5. Regional Planning Coordination.

The public hearings on the draft FEPs will be held on the following dates, times and locations: 1. Pago Pago, American Samoa -- Saturday, October 22, 2005, from 9 a.m. to 12 noon at the Utulei Convention Center, Pago Pago, American Samoa 96799. 2. Saipan, CNMI -- Tuesday October 25, 2005, from 6 to 9 p.m. at the American Memorial Park Visitor's Center Auditorium, Garapan, CNMI 96950. 3. Tinian, CNMI -- Wednesday, October 26, 2005, from 6 to 9 p.m. at the Mayor's Office Conference Room, San Jose, CNMI 96950. 4. Rota, CNMI -- Thursday, October 27, 2005, from 6 to 9 p.m. at the Northern Marianas College, Room A2, Rota Tatchog Campus, CNMI 96950. 5. Oahu, HI -- Tuesday, November 1, 2005, from 6 to 9 p.m. at the Ala Moana Hotel, 410 Atkinson Dr., Honolulu, HI 96815. 6. Tumon Bay, Guam -- Friday November 11, 2005, 10 a.m., at the Hilton Guam Resort, 96913.

Title: Modifications of Secondary Treatment Requirements for Discharges Into Marine Waters.

Abstract: The Clean Water Act (CWA) 301(h) program involves collecting information from two sources: (1) The municipal wastewater treatment facility, commonly called a publicly owned treatment works (POTW); and (2) the State in which the POTW is located. Municipalities had the opportunity to apply for a waiver from secondary treatment requirements, but that opportunity closed in December 1982. A POTW that seeks a section 301(h) waiver does so voluntarily to obtain or retain a benefit. A POTW seeking to obtain a 301(h) waiver, holding a current waiver, or reapplying for a waiver, provides application, monitoring, and toxic control program information. The State provides information on its determination whether the proposed conditions of the waiver ensure the protection of water quality, biological habitats, and beneficial uses of receiving waters, and whether the discharge will result in additional treatment, pollution control, or any other requirement for any other point or nonpoint sources. The State also provides information to certify that the discharge will meet all applicable State laws and that the State accepts all permit conditions. EPA requires updated information on the discharge to: (1) Determine whether the section 301(h) criteria are still being met and whether the section 301(h) waiver should be reissued; (2) determine whether the water quality, biological habitats, and beneficial uses of the receiving waters are protected; and (3) ensure that the permittee is effectively minimizing industrial and nonindustrial toxic pollutant and pesticide discharges into the treatment works. EPA needs information from the State to: (1) Allow the State's views to be taken into account when EPA reviews the section 301(h) application and develops permit conditions; and (2) ensure that all State laws are met and that the State accepts all permit conditions. This information is the means by which the State can non-concur with a section 301(h) approval decision made by the EPA Regional office. Regulations implementing CWA section 301(h) are found at 40 CFR part 125, subpart G. The information covered by this information collection request involves treatment plant operating data, effects of POTWs' discharges on marine environments, and States' viewpoints on issues concerning effects of POTWs' discharges on marine environments.
