[Docket FAA 2005-21523; Airspace Docket No. 05-AWP-07]

Establishment of Class E3 Airspace, Riverside March Field, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes a Class E3 airspace area at Riverside March Field, CA.

EFFECTIVE DATE: 0901 UTC December 22, 2005.

FOR FURTHER INFORMATION CONTACT:

Debra Trindle, Western Terminal Service Area, Airspace Specialist, AWP-520, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (310) 725-6613.

SUPPLEMENTARY INFORMATION:**History**

On August 2, 2005, the FAA proposed to establish Class E3 airspace at Riverside March Field, CA. Class E3 airspace areas are designated as arrival extensions to a Class C surface area. Class E arrival extensions are primarily designated to provide additional controlled airspace ancillary to a surface area to protect instrument operations for the primary airport, without imposing additional communications burdens on airspace users. This action is necessary at Riverside March Field to provide controlled airspace for Category E aircraft conducting circling maneuvers in conjunction with published Standard Instrument Approach Procedures. Generally, Category E aircraft are very large and/or high performance. These aircraft require additional airspace when conducting circling maneuvers. This action will establish the Class E3 airspace at Riverside March Field.

Interested parties were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. No comments were received. Class E3 airspace is published in Paragraph 6003 of FAA Order 7400.9N dated September 1, 2005, and effective September 16, 2005, which is incorporated by reference in 14 CFR 71.1. The Class E Surface Area airspace designation listed in this document would be published subsequently in this Order.

The Rule

This amendment to 14 CFR part 71 establishes Class E3 airspace at Riverside March Field, CA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Docket FAA 2005–21078; Airspace Docket 05–ANM–07]

Establishment of Class E Airspace; Eagle, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This final rule will establish Class E airspace at Eagle, CO. Additional Class E airspace is necessary to accommodate aircraft using a new Instrument Landing System or Localizer Distance Measuring Equipment (ILS or LOC DME) Standard Instrument Approach Procedure (SIAP) at Eagle County Regional Airport. This change is necessary for the safety of Instrument Flight Rules (IFR) aircraft executing the new SIAP at Eagle County Regional Airport, Eagle, CO.

EFFECTIVE DATES: 0901 UTC, October 28, 2005.

FOR FURTHER INFORMATION CONTACT: Ed Haeseker, Federal Aviation Administration, Western En Route and Oceanic Area Office, Airspace Branch, 1601 Lind Avenue SW., Renton, WA, 98055–4056; telephone (425) 227–2527.

SUPPLEMENTARY INFORMATION:**History**

On May 25, 2005, the FAA proposed to amend Title 14 Code of Federal Regulations part 71 (14 CFR part 71) by establishing Class E airspace at Eagle, CO (70 FR 32275). The proposed action would provide additional controlled airspace to accommodate the new ILS or LOC DME SIAP at Eagle County Regional Airport, Eagle, CO. Interested parties were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. No comments were received. Class E airspace designations are published in paragraph 6005 of the FAA Order 7400.9N dated

September 1, 2005, and effective September 5, 2005, which is incorporated by reference in 14 CFR part 71.1. The Class E airspace designations listed in this document will be published subsequently in that order.

The Rule

This amendment to 14 CFR part 71 establishes Class E airspace at Eagle, CO, by providing additional controlled airspace for aircraft executing the new ILS or LOC DME SIAP at the Eagle County Regional Airport. This additional controlled airspace extending upward from 700 feet or more above the surface is necessary for the containment and safety of IFR aircraft executing this SIAP procedure and transitioning to/from the en route environment.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep the regulations current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
