#### SUPPLEMENTARY INFORMATION:

*OMB Control No.:* 3060–0783.

*Title:* Section 90.176, Coordination Notification Requirements on Frequencies Below 512 MHz.

*Form No.:* N/A.

*Type of Review:* Extension of a currently approved collection.

*Respondents:* Business or other for-profit.

*Number of Respondents:* 15 respondents; 3,900 responses.

*Estimated Time Per Response:* .50 hours.

*Frequency of Response:* On occasion reporting requirement and third party disclosure requirement.

*Total Annual Burden:* 1,950 hours.

*Annual Cost Burden:* N/A.

*Privacy Act Impact Assessment:* N/A.

*Needs and Uses:* Section 90.176 requires each Private Land Mobile frequency coordinator to provide, within one business day, a listing of their frequency recommendations to all other frequency coordinators in their respective pool, and, if requested, an engineering analysis. Any method can be used to ensure this compliance with

the “one business day requirement” and must provide, at a minimum, the name of the applicant; frequency or frequencies recommended; antenna locations and heights; the effective radiated power; the type(s) of emission; the description of the service area; and the date and time of the recommendation. If a conflict in recommendations arises, the affected coordinators are jointly responsible for taking action to resolve the conflict, up to and including notifying the Commission that an application may have to be returned.

This requirement seeks to avoid situations where harmful interference is created because two or more coordinators recommend the same frequency in the same area at approximately the same time to different applicants.

After the 60 day comment period ends, the Commission will submit this information to OMB as an extension (no change in requirements) in order to obtain the full three year clearance.

The reporting and recordkeeping requirements are for both Automated Marine Telecommunications Systems (AMTS) and amateur radio operators (or “ham operators”), who share AMTS spectrum. The AMTS is a specialized system of coast stations providing integrated and interconnected marine voice and data communications, somewhat like a cellular phone system for tugs, barges, and other vessels on these waterways. The amateur radio operators (“ham operators”) use some of the same frequencies (219–200 MHz) as AMTS stations on a secondary, non-interference basis for digital message forwarding systems. The reporting requirements, as established in 47 CFR
