

the new law. Tolerances are considered reassessed once the safety finding has been made or a revocation occurs. EPA has reviewed and made the requisite safety finding for the ODM tolerances, pending completion of the organophosphate cumulative assessment.

Although the ODM IRED was signed on August 5, 2002, certain components of the document, which did not affect the final regulatory decision, were undergoing final editing at that time. These components, including the list of additional generic data requirements, summary of labeling changes, appendices, and other relevant information, have been added to the ODM IRED document. In addition, subsequent to signature, EPA identified several minor errors and ambiguities in the document. These additions or changes do not alter the conclusions documented in the 2002 ODM IRED. Label language and use parameters for use of ODM on lettuce were altered based on submission of additional information that affected the risk conclusions for this use. Label changes are described in detail in the "Label Changes Summary Table" in section V.D. of the ODM IRED and in the "Amendment to the 2002 Oxydemeton-methyl IRED," which are included in the public docket for ODM.

EPA is applying the principles of public participation to all pesticides undergoing reregistration and tolerance reassessment. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** on May 14, 2004 (69 FR 26819) (FRL-7357-9), explains that in conducting these programs, EPA is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of issues, and degree of public concern associated with each pesticide. Due to its uses, risks, and other factors, ODM was reviewed through the full 6-Phase public participation process. Through this process, EPA worked extensively with stakeholders and the public to reach the regulatory decisions for ODM.

The reregistration program is being conducted under Congressionally mandated time frames, and EPA recognizes the need both to make timely decisions and to involve the public. Since all issues related to this pesticide were resolved through consultations with stakeholders before issuing the ODM IRED Amendment, the Agency is issuing the ODM IRED and ODM IRED Amendment without a comment period. Decisions presented in this IRED may be supplemented by further risk mitigation

measures when EPA concludes its cumulative assessment of the organophosphate pesticides.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA as amended, directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product-specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."

Section 408(q) of the FFDCA, 21 U.S.C. 346a(q), requires EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of the FFDCA. This review is to be completed by August 3, 2006.

SUPPLEMENTARY INFORMATION: On August 29, 2005 (70 FR 51042), EPA solicited comment on the Agency's completed 2005 annual review and pending 2006 annual reviews of existing effluent limitations guidelines and pretreatment standards under CWA sections 301(d), 304(b), 304(g), and 307(b), and the Preliminary 2006 Effluent Guidelines Program Plan under CWA section

304(m). EPA also opened a second comment period on the draft *Strategy for National Clean Water Industrial Regulations* ("draft Strategy") (see 67 FR 71165, November 29, 2002). The August 29, 2005 notice describes: (1) The Agency's 2005 annual review of existing effluent limitations guidelines and pretreatment standards under the Clean Water Act (CWA) sections 301(d), 304(b), 304(g), and 307(b); (2) EPA's review of indirect dischargers without categorical pretreatment standards to identify potential new categories for pretreatment standards under CWA sections 304(g) and 307(b); and (3) the preliminary 2006 effluent guidelines program plan under CWA section 304(m) ("Plan"). EPA anticipates completing the final 2006 Plan by August 2006. As required by CWA section 304(m), the final Plan will: (1) Present a schedule for EPA's annual review of existing effluent guidelines under CWA section 304(b) and a schedule for any effluent guidelines revisions; and (2) identify industries for which EPA has not promulgated effluent guidelines but may decide to do so through rulemaking and a schedule for these rulemakings.

The original comment deadline was October 28, 2005. Numerous stakeholders have requested an extension to the comment period in order to adequately understand and provide comments. Additionally, one commenter requested more time due to the difficulty of coordinating with Gulf Coast facilities that were recently incapacitated by hurricanes Rita and Katrina. This action extends the comment period for 30 days.

Dated: October 20, 2005.

Benjamin H. Grumbles,

Assistant Administrator for Water.
