SUPPLEMENTARY INFORMATION:

Title: National Animal Identification System; Cooperative Agreements for Field Trials and Research Projects.

OMB Number: 0579-XXXX.

Type of Request: Approval of a new information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) regulates the importation and interstate movement of animals and animal products and conducts various other activities to protect the health of our Nation's livestock and poultry.

Fundamental to controlling any disease threat, foreign or domestic, to the Nation's animal resources is to have a system that can identify individual animals or groups, the premises where they are located, and the date of entry to each premises.

USDA initiated implementation of a national animal identification system (NAIS) in 2004. The goal of the NAIS is to be able to identify all animals and premises that have had contact with a foreign or domestic animal disease of concern within 48 hours after discovery. As an information system that provides for rapid tracing of infected and exposed animals during an outbreak situation, the NAIS will help limit the scope of such outbreaks and ensure that they are contained and eradicated as quickly as possible. USDA's first priority was to facilitate premises registration. Producers, nationwide, now have the opportunity to register their premises. The next step is to register a majority of eligible premises in each State. With the foundation of premises identification in place, the identification of individual animals and the recording of their premises-to-premises movements can occur.

The 48-hour traceback goal is contingent upon the completeness of the animal movement data. Producers, market operators, abattoirs, and other establishments where animals are held will collect the animal identification numbers (AINs) or group lot identification numbers as the animals arrive at their premises and submit the data to the appropriate privately-held animal tracking database. The collection of complete animal movement information is an important goal for achieving 48-hour traceback.

USDA plans to provide funding to State and tribal governments to support field trials and research projects that address problems or questions concerning NAIS implementation. USDA anticipates funding approximately 15 projects based on applications from State and tribal governments.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 1 year.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our

information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 40 hours per response.

Respondents: State and federally recognized tribal governments.

Estimated annual number of respondents: 35.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 35.

Estimated total annual burden on respondents: 1,400 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 21st day of October 2005.

Elizabeth E. Gaston,

Acting Administrator, Animal and Plant Health Inspection Service.

International Trade Administration

[A-122-852]

**Notice of Extension of the Deadline for
Determining the Adequacy of the
Antidumping Duty Petition: Liquid
Sulfur Dioxide from Canada**

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: October 27, 2005.

FOR FURTHER INFORMATION CONTACT: Kate Johnson or Rebecca Trainor, AD/CVD Operations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482-4929 and (202) 482-4007, respectively.

Initiation of Investigation

The Petition

On September 30, 2005, the Department of Commerce ("Department") received an antidumping duty petition ("Petition") filed by Calabrian Corporation ("Petitioner") on behalf of the domestic industry producing liquid sulfur dioxide.

Scope of the Petition

The product covered by this petition is technical or commercial grade and refrigeration grade liquid sulfur dioxide of a minimum 99.98 percent assay. Sulfur dioxide is identified by the chemical formula SO₂. The CAS No. for sulfur dioxide is 7446-09-5. Liquid sulfur dioxide is pure sulfur dioxide gas

compressed through refrigeration and stored under pressure. Sulfur dioxide in its gaseous state is excluded from the petition.

Liquid sulfur dioxide subject to this petition is currently classifiable under subheading 2811.23.00 of the Harmonized Tariff Schedule of the United States ("HTSUS"). While the HTSUS subheading is provided for convenience and Customs purposes, the written description of the scope of this petition is dispositive.

Determination of Industry Support for the Petition

Section 732(b)(1) of the Tariff Act of 1930, as amended ("the Act") requires that a petition be filed by or on behalf of the domestic industry. Section 732(c)(4)(A) of the Act provides that the Department's industry support determination be based on whether a minimum percentage of the relevant industry supports the petition. A petition meets this requirement if the domestic producers or workers who support the petition account for: (i) at least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 732(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, the Department shall: (i) poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A), or (ii) if there is a large number of producers, determine industry support using a statistically valid sampling method to poll the industry.

Extension of Time

Section 732(c)(1)(A)(ii) of the Act provides that within 20 days of the filing of an antidumping duty petition, the Department will determine, inter alia, whether the petition has been filed by or on behalf of the U.S. industry producing the domestic like product. Section 732(c)(1)(B) of the Act provides that the deadline for the initiation determination can be extended by 20 days in any case in which the Department must "poll or otherwise determine support for the petition by the industry . . ." Because it is not clear from the petition whether the industry support criteria have been met, we have determined to extend the time for initiating an investigation in order to
