

Hurricane Wilma. FPL requests that the waiver begin on October 25, 2005 and continue through November 30, 2005. Effective on the date of this notice, the Commission will grant FPL a waiver, until November 15, 2005, of the otherwise applicable requirements of section 358.4(a)(2) to record a log of emergency-related deviations from the Standards of Conduct and to post these deviations on its web site.

FPL explains that Hurricane Wilma was a Category 3 hurricane with hurricane force winds that cut a 180-mile swath across southern Florida and had tropical-force winds well beyond that. FPL states that about 60 percent of its 35-county territory was affected, covering nearly 22,000 square miles. FPL states, further, that its transmission lines and substations have been severely damaged. FPL notes that approximately 3.2 million of its 4.3 million customers were without power at the height of the damage. FPL estimates that it may take four to five weeks to restore power to all its customers. FPL explains that its restoration force totals over 6,000 employees, including out-of-state crews and contractors, in addition to FPL teams.

FPL states that the entire workforce of FPL Group is involved in these restoration efforts on FPL's transmission and distribution systems. FPL anticipates that, due to the magnitude of the task, it is likely that there will be numerous communications among employees concerning the status of the restoration and to coordinate joint operations and repair work. FPL explains that the requirement to report each deviation of the Standards of Conduct within twenty-four hours would create a monumental task that could slow its restoration efforts. FPL notes that the waiver request is limited to those employees involved in the Hurricane Wilma restoration effort and the communications required to carry out the restoration. FPL concludes, therefore, that good cause exists to grant it a waiver of this requirement.

The Commission has previously granted similar waivers due to Hurricane Katrina¹ and Hurricane Rita.² The waivers, among other things, allowed affected transmission providers to delay for a limited period of time

compliance with the requirement of section 358.4(a)(2) of the Commission's regulations, 18 CFR 358.4(a)(2)(2005), to report to the Commission and post on the OASIS or Internet Web site, as applicable, each emergency that resulted in any deviation from the Standards of Conduct. In addition, due to the extreme nature of the emergency in each instance, the Commission also waived, for those limited periods, the requirements to record and retain a record of each deviation of the Standards of Conduct.³

The Commission grants FPL a waiver of the recording and posting requirements of section 358.4(a)(2) of the Commission's regulations in these emergency circumstances, effective on the date of this notice until November 15, 2005, without prejudice to FPL requesting a further extension, if necessary. The Commission directs FPL to ensure that the employees affected by this waiver observe the no-conduit prohibition in the Standards of Conduct, 18 CFR 358.5(b)(7) (2005).

Secretary.

ICR Title: Recordkeeping and Reporting Requirements for Allegations of Significant Adverse Reactions to Human Health or the Environment (TSCA Section 8(c)).

ICR Status: This is a request to renew an existing approved collection. This ICR is scheduled to expire on December 31, 2005. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: TSCA section 8(c) requires companies that manufacture, process, or distribute chemicals to maintain records of significant adverse reactions to health or the environment alleged to have been caused by such chemicals. Since section 8(c) includes no automatic reporting provision, EPA can obtain and use the information contained in company files only by inspecting those files or requiring reporting of records that relate to specific substances of concern. Therefore, under certain conditions, and using the provisions found in 40 CFR part 717, EPA may require companies to report such allegations to the Agency.

EPA uses such information on a case-specific basis to corroborate suspected adverse health or environmental effects of chemicals already under review by EPA. The information is also useful to identify trends of adverse effects across the industry that may not be apparent to any one chemical company.

Responses to the collection of information are mandatory (see 40 CFR

717). Respondents may claim all or part of a notice as CBI. EPA will disclose information that is covered by a CBI claim only to the extent permitted by, and in accordance with, the procedures in 40 CFR part 2.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register**, are listed in 40 CFR part 9 and included on the related collection instrument or form, if applicable.

Burden Statement: The total annual public burden for this collection of information is estimated to be about 24,550 hours, with the burden ranging between 15 minutes and 8 hours per response depending upon the type(s) of activity that a respondent must complete. Burden is the total time, effort or financial resources expended by persons to generate, maintain, retain or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this action are companies that manufacture, process, import, or distribute in commerce chemical substances or mixtures.

Frequency of Collection: On occasion.

Estimated total/average number of responses for each respondent: 1.

Estimated No. of Respondents: 13,445.

Estimated Total Annual Burden on Respondents: 24,548 hours.

Estimated Total Annual Labor Costs: \$1,232,417.

Changes in Burden Estimates: There is a decrease of 5,391 hours (from 29,939 hours to 24,548 hours) in the total estimated respondent burden compared with that identified in the information collection request most recently approved by OMB. This decrease is an adjustment and is based on several factors that are described in detail in the ICR.

Dated: August 9, 2005.

Director, Collection Strategies Division.
