

Estimated Time Per Response: 5 minutes for completion of certificate; 4 hours for inspection, and 15 minutes for recordkeeping.

Frequency of Response: Annual and every 5 year reporting requirements, and third party disclosure requirement, and recordkeeping requirement.

Total Annual Burden: 5,245 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Needs and Uses: The Communications Act requires the Commission to inspect the radio installation of large cargo ships and certain passenger ships at least once a year to ensure that the radio installation is in compliance with the requirements of the Communications Act. Additionally, the Communications Act requires the inspection of small passenger ships at least once every five years. The Safety Convention (which the United States is signatory) also requires an annual inspection. However, the Safety Convention permits an Administrator to entrust the inspections to either surveyors nominated for the purpose or to organizations recognized by it. Therefore, the United States can have other parties conduct the radio inspection of vessels for compliance with the Safety Convention. The Commission allows FCC-licensed technicians to conduct these inspections. FCC-licensed technicians certify that the ship passed an inspection and issue a safety certificate. These safety certificates (FCC Forms 806, 824, 827 and 829) indicate that the vessel complies with the Communications Act and the Safety Convention. These technicians are required to provide a summary of the results of the inspection in the ship's log. In addition, the vessel's owner, operator, or ship's master must certify in the ship's log that the inspection was satisfactory. Inspection certificates issued in accordance with the Safety Convention must be posted in a prominent and accessible place on the ship. The purpose of the information is to ensure that the inspection was successful so that passengers and crewmembers of certain United States ships have access to distress communications in an emergency.

The information collection requirements that are subject to OMB approval are the following:

A. Location Registration. Requires providers to interconnected VoIP services to obtain location information from their customers for use in the routing of 911 calls and the provision of location information to emergency answering points.

D. Record of Customer Notification. Requires VoIP providers to obtain and keep a record of affirmative acknowledgement by every subscriber, both new and existing, of having received and understood this advisory.

E. User Notification. In addition, in order to ensure to the extent possible that the advisory is available to all potential users of an interconnected VoIP service, interconnected VoIP service providers must distribute to all subscribers, both new and existing, warning stickers or other appropriate labels warning subscribers if E911 service may be limited or not available and instructing the subscriber to place them on and/or near the customer premises equipment used in conjunction with the interconnected VoIP service.

F. Compliance Letter. Requires all interconnected VoIP providers to submit a letter to the Commission detailing their compliance with the rules set forth in the Order no later than 120 days after the effective date of the Order. This letter will enable the Commission to ensure that interconnected VoIP providers have achieved E911 compliance by the established deadline.
