

north-south and east-west state highway and county road rights-of-way enroute to NWE's 230-kV substation. Major river crossings include those of the Marias approximately 10 miles south of Cut Bank, and the Teton, approximately 14 miles south of Brady, Montana.

In addition to transmission line routes within the above proposed corridors, the EA will consider the environmental impacts of the "No Action" alternative. Under the No Action alternative DOE would not issue a Presidential permit and DEQ would not issue a Certificate of Compliance. DOE and DEQ will also consider any additional reasonable alternatives that result from comments received during the scoping period.

However, not issuing the Presidential permit or Certificate would not necessarily imply maintenance of the status quo. MATL indicated its proposed action is to construct a merchant transmission line to improve the reliability of both the Alberta and Montana power transmission grids and to enable the development of new power generation projects in Alberta and Montana. MATL asserts that the proposed transmission facilities would enable the development of new wind electric generation projects because the proposed line route passes through an area that has tremendous wind generation potential. If the Presidential permit and Certificate are not issued and this proposed project is not built, other transmission facilities may be constructed in support of future wind development. The No Action Alternative will address the environmental impacts that are reasonably foreseeable to occur if the Presidential permit and Certificate are not issued.

Identification of Environmental Issues

In the EA, DOE and DEQ will examine public health and safety effects and environmental impacts in the U.S. from the proposed transmission facilities. The EA will be prepared in accordance with the requirements of the Council on Environmental Quality NEPA Implementing Regulation (40 CFR parts 1500–1508) and DOE's NEPA Implementing Procedures (10 CFR part 1021). Because the project involves action in a floodplain, the EA will include a floodplain assessment and floodplain statement of findings in accordance with DOE regulations for compliance with floodplain and wetlands environmental review (10 CFR part 1022). Tribal governments and Federal, State and local agencies with special expertise or jurisdiction over the proposed project are being invited to become cooperating agencies on the EA.

This notice is to inform agencies and the public of the proposed project and to solicit comments and suggestions for consideration in the preparation of the EA. To help the public frame its comments, this notice contains a preliminary list of potential environmental issues in the U.S. that DOE and MATL have tentatively identified for analysis. These issues include:

1. Impact from development of wind generation resources;
2. Impacts on farming;
3. Impacts on protected, threatened, endangered, or sensitive species of animals or plants, or their critical habitats;
4. Impacts on floodplains and wetlands;
5. Impacts on cultural or historic resources;
6. Impacts on human health and safety;
7. Impacts on air, soil, and water;
8. Visual impacts; and
9. Socioeconomic impacts, and disproportionately high and adverse impacts on minority and low-income populations.

Scoping Process

Interested parties are invited to participate in the scoping process both to refine the environmental issues to be analyzed and to identify the reasonable range of alternatives. Both oral and written comments will be considered and given equal weight by DOE and DEQ.

Public scoping meetings will be held at the locations, dates, and times indicated above under the **DATES** and **ADDRESSES** sections. The scoping meetings will be structured as informal open houses. They will provide interested parties the opportunity to view proposed project exhibits, ask questions, and make comments. DOE, DEQ, and any cooperating agency representatives will be available to answer questions and provide additional information to attendees.

DOE and DEQ invite those entities with jurisdiction by law or special expertise with respect to environmental issues to be cooperating agencies on the EA, as defined at 40 CFR 1501.6. Cooperating agencies have certain responsibilities to support the NEPA process, as specified at 40 CFR 1501.6(b).

Persons submitting comments during the scoping process will receive copies of the Pre-Approval EA. Persons who do not wish to submit comments or suggestions at this time but who would like to receive a copy of the document for review and comment when it is

issued should notify Mrs. Ellen Russell and also Tom Ring at the addresses provided above.

Pre-Approval EA Schedule and Availability

The Pre-Approval EA is scheduled to be issued in the spring, 2006, at which time its availability will be announced in the **Federal Register** and public comments again will be solicited.

Issued in Washington, DC, on November 16, 2005.
