(UEC) (collectively, the Urenco Group or Urenco), the producers and exporters of the subject merchandise. We note that this request covered all subject merchandise produced by Urenco in Germany, the Netherlands, and the UK. On February 25, 2005, we received a timely request for review from petitioners.¹ On February 25, 2005, we received timely requests for revocation of the CVD orders from the Governments of Germany, the Netherlands, and the UK.

¹ Petitioners are the United States Enrichment Corporation (USEC) and USEC Inc.

In accordance with 19 CFR 351.213(b), these reviews cover only those producers or exporters for which a review was specifically requested. The companies subject to these reviews are UD, UNL, UCL, Urenco Ltd., and Urenco Inc. These reviews cover four programs.

Scope of the Order

The product covered by these orders is all LEU. LEU is enriched uranium hexafluoride (UF₆) with a U²³⁵ product assay of less than 20 percent that has not been converted into another chemical form, such as UO₂, or fabricated into nuclear fuel assemblies, regardless of the means by which the LEU is produced (including LEU produced through the down-blending of highly enriched uranium).

Certain merchandise is outside the scope of these orders. Specifically, these orders do not cover enriched uranium hexafluoride with a U²³⁵ assay of 20 percent or greater, also known as highly enriched uranium. In addition, fabricated LEU is not covered by the scope of these orders. For purposes of these orders, fabricated uranium is defined as enriched uranium dioxide (UO₂), whether or not contained in nuclear fuel rods or assemblies. Natural uranium concentrates (U₃O₈) with a U²³⁵ concentration of no greater than 0.711 percent and natural uranium concentrates converted into uranium hexafluoride with a U²³⁵ concentration of no greater than 0.711 percent are not covered by the scope of these orders.

Also excluded from these orders is LEU owned by a foreign utility end-user and imported into the United States by or for such end-user solely for purposes of conversion by a U.S. fabricator into uranium dioxide (UO₂) and/or fabrication into fuel assemblies so long as the uranium dioxide and/or fuel assemblies deemed to incorporate such imported LEU (i) remain in the possession and control of the U.S. fabricator, the foreign end-user, or their designed transporter(s) while in U.S. customs territory, and (ii) are re-exported within eighteen (18) months of entry of the LEU for consumption by the end-user in a nuclear reactor outside the United States. Such entries must be accompanied by the certifications of the importer and end-user.

The merchandise subject to these orders is currently classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) at subheading 2844.20.0020. Subject merchandise may also enter under 2844.20.0030, 2844.20.0050, and 2844.40.00. Although the HTSUS subheadings are provided for convenience and customs purposes,
