SUPPLEMENTARY INFORMATION: The project purpose is to protect and improve the quality of water delivered to CCWD's untreated- and treated-water customers. Project objectives are to improve delivered water quality, especially during drought periods; protect and improve health and/aesthetic benefits to customers; improve operational flexibility; and protect delivered water quality during emergencies. Water quality problems for CCWD result from elevated concentrations of salinity (chloride and bromide), minerals, organic carbon, and turbidity at CCWD's Sacramento-San Joaquin River Delta intakes. The proposed action includes the construction of a new intake and fish screen in the Delta on Victoria Canal, a pumping plant, and an associated 2- to 4-mile-long pipeline from the new intake across Victoria Island to CCWD's existing Old River conveyance system. Reclamation actions associated with the proposed action are agreeing to a change in point of diversion of Central Valley Project (CVP) water under Contract No. I75r-3401A-LTR1 and petitioning the California State Water Resources Control Board for necessary water right changes regarding point of diversion. Through the proposed action, CCWD is seeking to relocate some of its

diversions to a Delta location with better water quality and would not seek to increase its water rights, CVP contract amounts, or permitted Los Vaqueros Reservoir filling rates.

Oral and written comments, including names and home addresses of respondents, will be available for public review. Individual respondents may request that their home address be withheld from public disclosure, which will be honored to the extent allowable by law. There may be circumstances in which a respondent's identity may also be withheld from public disclosure, as allowable by law. If you wish to have your name and/or address withheld, you must state this prominently at the beginning of your comment. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public disclosure in their entirety.

SUPPLEMENTARY INFORMATION:

I. Abstract

Office of Management and Budget (OMB) regulations at 5 CFR part 1320, which implement the Paperwork Reduction Act of 1995 (Pub. L. 104-13), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8 (d)). This notice identifies an information collection activity that the Office of the Special Trustee for American Indians will submit to OMB for extension or re-approval.

Public Law 103-412, The American Indian Trust Fund Management Reform Act of 1994, allows Indian tribes on a voluntary basis to take their funds out of trust status within the Department of the Interior (and the Federal Government) in order to manage such funds on their own. 25 CFR part 1200, subpart B, § 1200.13, "How does a tribe apply to withdraw funds?" describes the requirements for application for withdrawal. The Act covers all tribal trust funds including judgment funds as well as some settlement funds, but excludes funds held in Individual Indian Money accounts. Both the Act and the regulation state that upon

withdrawal of the funds, the Department of the Interior (and the Federal Government) have no further liability for such funds. Accompanying their application for withdrawal of trust funds, tribes are required to submit a Management Plan for managing the funds being withdrawn, to protect the funds once they are out of trust status.

This information collection allows the Office of the Special Trustee to collect the tribes' applications for withdrawal of funds held in trust by the Department of the Interior. If this information were not collected, the Office of the Special Trustee would not be able to comply with The American Indian Trust Fund Management Reform Act of 1994, and tribes would not be able to withdraw funds held for them in trust by the Department of the Interior.
