

Massachusetts, from the FM Table of Allotments, allots Channel 223B at Andover, Massachusetts, as the community's first local FM service, and modifies the license of Station WXR(V) to specify operation on Channel 223B at Andover. Channel 223B can be allotted to Andover, Massachusetts, in compliance with the Commission's minimum distance separation requirements at WXR(V)'s existing transmitter site. The coordinates for Channel 223B at Andover, Massachusetts, are 42-46-23 North Latitude and 71-06-01 West Longitude, with a site restriction of 13.1 km (8.1 miles) north of Andover.

DATES: Effective July 3, 2006.

FOR FURTHER INFORMATION CONTACT: Deborah Dupont, Media Bureau, (202) 418-2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Report and Order*, MB Docket No. 05-108, adopted May 17, 2006, and released May 19, 2006. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Information Center, Portals II, 445 12th Street, SW, Room CY-A257, Washington, DC 20554. The complete text of this decision also may be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., 445 12th Street, SW, Room CY-B402, Washington, DC, 20554, (800) 378-3160, or via the company's Web site, <http://www.bcpweb.com>. The Commission will send a copy of this *Report and Order* in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A).

List of Subjects in 47 CFR part 73

Radio, Radio broadcasting.

■ For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 73 as follows:

PART 73—RADIO BROADCAST SERVICES

■ 1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, 336.

§ 73.202 [Amended]

■ 2. Section 73.202(b), the Table of FM Allotments under Massachusetts is amended by adding Andover, Channel 223B, and by removing Haverhill, Channel 223B.

Federal Communications Commission.

[DA 06-1053; MB Docket No. 06-19; RM-11288]

Radio Broadcasting Services; Hattiesburg and Sumrall, MS

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In response to a *Notice of Proposed Rule Making*, this *Report and Order* upgrades Channel 226A, FM Station WGDQ, Hattiesburg, Mississippi, to Channel 226C3, reallots Channel 226C3 from Hattiesburg to Sumrall, Mississippi, and modifies Station WGDQ's license accordingly. The coordinates for Channel 226C3 at Sumrall, Mississippi, are 31-33-15 NL and 89-24-50 WL, with a site restriction of 19.5 kilometers (12.1 miles) northeast of Sumrall.

DATES: Effective July 3, 2006.

ADDRESSES: Federal Communications Commission, 445 12th Street, S.W., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: R. Barthen Gorman, Media Bureau, (202) 418-2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Report and Order*, MB Docket No. 06-19, adopted May 17, 2006, and released May 19, 2006. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, 445 12th Street, SW, Room CY-A257, Washington, DC, 20554. The document may also be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., Portals II, 445 12th Street, SW, Room CY-B402, Washington, DC, 20554, telephone 1-800-378-3160 or <http://www.BCPIWEB.com>. The Commission will send a copy of this *Report and Order* in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A).

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 06-1049; MB Docket No. 05-104; RM-10837, RM-10838]

Radio Broadcasting Services; Black Rock, Cave City and Cherokee Village, AR and Thayer, MO

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 252C2 for Channel 252C3 at Cherokee Village, Arkansas, reallots Channel 252C2 to Black Rock, Arkansas, and modifies the Station KFCM license to specify operation on Channel 252C2 at Cherokee Village. To replace the loss of the sole local service at Cherokee Village, this document also reallots Channel 222C2 from Thayer, Missouri, and modifies the Station KSAR license to specify Cherokee Village as the community of license. This document also reclassifies the Channel 253C allotment at Little Rock, Arkansas, to Channel 253C0, and modifies the Station KURB license at Little Rock, Arkansas, to specify operation on Channel 253C0. The reference coordinates for the Channel 252C2 allotment at Black Rock, Arkansas, are 36-05-25 and 91-08-55. The reference coordinates for the Channel 222C2 allotment at Cherokee Village, Arkansas, are 36-21-58 and 91-28-35. The reference coordinates for the Channel 253C0 allotment at Little rock, Arkansas, are 34-47-56 and 92-29-44.

With this action, the proceeding is terminated.

DATES: Effective July 3, 2006.

BILLING CODE 6712-01-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. NHTSA-2006-24980]

RIN 2127-AI66

Federal Motor Vehicle Safety Standards; Child Restraint Systems

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule establishes breaking strength requirements for child restraint webbing. Under today's final rule, new webbing that attaches a restraint to a vehicle is required to have a minimum breaking strength of 15,000 N. New restraint webbing used to restrain a child in a restraint is required to have a minimum breaking strength of 11,000 N. Today's final rule maintains the percent-of-strength requirements for webbing after it is exposed to specific environmental conditions that have been required under the child restraint system standard. Today's final rule also clarifies the weights used in the webbing abrasion test procedure. The requirements of this final rule increase the likelihood that the webbing of child restraint systems will sufficiently perform throughout the life of a child restraint.

DATES: The effective date of this final rule (*i.e.*, the date that the rule amends the Code of Federal Regulations) is August 7, 2006. The compliance date of this rule is September 1, 2007 (all child restraints manufactured on or after this date must meet the requirements of this final rule).

Petitions for reconsideration must be received not later than July 24, 2006.

ADDRESSES: Petitions must be submitted to: Administrator, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: For technical issues, you may contact Mr. Tewabe Asebe, Office of Rulemaking (Telephone: 202-366-2365) (Fax: 202-366-7002). For legal issues, you may contact Mr. Chris Calamita, Office of Chief Counsel (Telephone: 202-366-2992) (Fax: 202-366-3820). You may send mail to these officials at the National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.

I. Strength Requirements

a. Background and the NPRM

Federal Motor Vehicle Safety Standard (FMVSS) No. 213, *Child restraint systems*, regulates child restraint systems used in motor vehicles and aircraft (49 CFR 571.213). Among other things, this standard specifies requirements for the webbing material used in child restraint systems, including requirements for the strength of the webbing after the webbing is subjected to abrasion (S5.4.1(a)), light exposure (S5.4.1(b)), and micro-organisms (S5.4.1(b)).¹ These specified conditions simulate the conditions that webbing will likely encounter through normal use. Evaluating the performance of the webbing after subjecting the webbing to those conditions better ensures the long-term integrity of the webbing.

Each of the requirements for exposed webbing is expressed in the form of a percent-of-strength of the webbing measured before exposure. S5.4.1(a) specifies that, after being subjected to abrasion as specified in certain sections of FMVSS No. 209, the webbing must have a breaking strength of not less than 75 percent of the strength of the unabraded webbing. S5.4.1(b) of FMVSS No. 213, referring to S4.2(e) in FMVSS No. 209, specifies that after being exposed to light, the webbing shall have a breaking strength of not less than 60 percent of the strength before exposure. The same section of FMVSS No. 213 also refers to S4.2(f) of FMVSS No. 209, which specifies that after being exposed to micro-organisms, the webbing shall have a breaking strength of not less than 85 percent of the strength before exposure to micro-organisms.

However, FMVSS No. 213 does not currently specify a minimum breaking strength for new webbing against which the percentages would be measured. Addressing this aspect of the standard,

¹ S5.4.1(a) and (b) reference FMVSS No. 209, 49 CFR 571.209, *Seat belt assemblies*, which specifies requirements and the associated test procedures for seat belt assemblies.
