Approval and Promulgation of Air Quality Implementation Plans; Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the Indiana State Implementation Plan (SIP) for ozone. The state is adding four chemical compounds to its list of compounds that are now exempt from being considered a volatile organic compound (VOC). Indiana also is removing a compound from the list of hazardous air pollutants (HAP). The revisions Indiana made parallel the changes EPA made to our VOC definitions and HAP list on November 29, 2004 and that became effective on December 29, 2004.

Four VOCs were found by EPA to make a negligible contribution to

tropospheric ozone formation. The compounds are: 1,1,1,2,2,3,3-heptafluoro-3-methoxy-propane, 3-ethoxy-1,1,1,2,3,4,4,5,5,6,6,6-dodecafluoro-2-(trifluoromethyl)hexane, 1,1,1,2,3,3,3-heptafluoropropane, and methyl formate. Companies producing or using the four compounds will no longer need to follow the VOC rules for these compounds.

The requirements for t-butyl acetate are also modified. It is not considered a VOC for emission limits and content requirements. T-butyl acetate will still be considered a VOC for the recordkeeping, emissions reporting, and inventory requirements.

Indiana is removing ethylene glycol monobutyl ether (EGBE) (2-Butoxyethanol) from its HAP list, too. EGBE will no longer be considered a hazardous air pollutant.

SUPPLEMENTARY INFORMATION: In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP submission as a direct final rule

without prior proposal because the Agency views this as a noncontroversial submission and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule.
