Background

In April of 1996, the FAA Administrator announced that the FAA would begin a comprehensive review and redesign of United States airspace. This endeavor became known as the National Airspace Redesign, now referred to as Airspace Management Program (AMP). The goal of AMP is to maintain and improve safety; improve efficiency; reduce delays; increase system flexibility, predictability, and access; and support the evolution of emerging technologies. The MASE project is the culmination of the AMP process with regard to aircraft operations in the Cleveland and Detroit terminal areas as well as in the high altitude, en route airspace environment. The purpose of MASE is to develop and implement new en route and terminal airspace procedures that would increase efficiency and enhance safety of aircraft movements in the airspace overlying and beyond the Cleveland and Detroit terminal areas. Specifically, the MASE project consists of changes to routes, fixes, altitudes, and holding patterns, as well as the development of new procedures and routes.

In support of the MASE project, FAA published an NPRM on June 16, 2006 (71 FR 34854) proposing to establish 16 VOR Federal Airways (V-65, V-176, V-383, V-396, V-406, V-410, V-414, V-416, V-418, V-426, V-467, V-486, V-542, V-584, V-586, and V-609); modify 13 VOR Federal Airways (V-14, V-26, V-40, V-72, V-75, V-90, V-96, V-103, V-116, V-133, V-297, V-435, and V-526); and revoke one VOR Federal Airway (V-42) over the East Central United States. This action proposes to modify VOR Federal Airway V-2 over the East Central United States to support the modified arrival and departure procedures to DTW that were proposed as a part of the MASE project.

The Proposal

The FAA is proposing to amend Title 14 Code of Federal Regulations (14 CFR) part 71 to modify VOR Federal Airway V-2 over the East Central United States. The purpose of this action is to support arrival and departure procedures to DTW that were modified in conjunction with MASE. Further, the FAA is proposing this action to enhance safety and to improve the efficient use of the navigable airspace within the areas of responsibility for Chicago and Cleveland ARTCCs.

VOR Federal Airways are published in paragraph 6010 of FAA Order 7400.9N, dated September 1, 2005, and effective September 15, 2005, which is incorporated by reference in 14 CFR 71.1. The VOR Federal Airways listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9N, Airspace Designations and Reporting Points, dated September 1, 2005, and effective September 15, 2005, is amended as follows:

In place of Stage II, Ford will comply with the standards of the Federal onboard refueling vapor recovery (ORVR) regulations, as well as meet other minor conditions. The exclusive use of ORVR will provide at least an equivalent amount of gasoline vapor capture as Stage II.

[Docket No. PHMSA-2003-15864; Notice 3]

RIN 2137-AD98

Pipeline Safety: Protecting Unusually Sensitive Areas From Rural Onshore Hazardous Liquid Gathering Lines and Low-Stress Lines

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), U.S. Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking.

SUMMARY: We are proposing to extend pipeline safety regulations to rural onshore hazardous liquid gathering lines and low-stress lines within a defined buffer of previously defined "unusually sensitive areas." These are non-populated areas requiring extra protection because of the presence of sole source drinking water resources, endangered species, or other ecological resources.

This proposal will define "regulated rural onshore gathering lines" and "regulated rural onshore low-stress lines" and require operators of the lines to comply with certain safety requirements. These proposed safety requirements will address the most common threats to the integrity of these rural lines: corrosion and third-party damage. This proposal is intended to provide additional integrity protection for unusually sensitive areas that could be affected by these lines and improve public confidence in the safety of hazardous liquid rural onshore gathering and low-stress lines.

DATES: Persons interested in submitting written comments on the rules proposed in this document must do so by November 6, 2006. PHMSA will consider late filed comments so far as practicable.
