

alternative. DOE did not select the Rescission of Presidential Permit alternative because it would not address the need for additional transmission capacity in the region.

DOE did not select the Previously Permitted Route alternative, nominally the "no action" alternative, because it would not achieve the consolidation of linear facility corridors as preferred by the State. This alternative would also have somewhat higher, but still low, impacts compared to the Modified Consolidated Corridors Route alternative. DOE did not select the Consolidated Corridors Route alternative because it would not avoid two areas addressed by route modifications in the Modified Consolidated Corridors Route alternative. DOE did not select the MEPCO South Route alternative because it had generally the highest impacts of any of the route alternatives, while providing no offsetting benefits to justify its selection.

For the foregoing reasons, DOE has decided to amend Presidential Permit PP-89 to authorize BHE to construct, operate, maintain, and connect the NRI along the Modified Consolidated Corridors Route as defined in the EIS, but with the condition noted in the *Decision* section above.
